

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, May 4, 2011 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (105 new fires)
New large fires:	0 (*)
Large fires contained:	1
Uncontained large fires: **	10
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

Nationally, there are 5 large fire being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

The 302nd Airlift Wing, Colorado Springs, CO and the 146th Air Wing, Channel Islands, CA are providing two each, MAFFS C-130 aircraft and support personnel to the state of Texas. The aircraft and personnel are based at Dyess Air Force Base under the command of Colonel Jack Pittman.

Southern Area (PL 4)

New fires:	39
New large fires:	0
Uncontained large fires:	5
Type 1 IMT committed	2
Type 2 IMT committed	3

A North Carolina IMT 2 (Hildreth) is assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas State IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones. Florida IMT 2 (Graham) is managing existing and new fires for the East Branch Operational Area in Texas.

Rock House, Texas Forest Service. IMT 1 (Wilder). Fort Davis, TX. Grass. Minimal fire activity.

Jarhead, Big Cypress National Preserve. IMT 1 (Hughes). Seven miles north of Oasis, FL. Southern rough. Active fire behavior. Residences and structures threatened.

Deaton Cole, Texas Forest Service. Thirty-seven miles southwest of Ozona, TX. Brush and grass. Minimal fire activity.

Oasis, Texas Forest Service. Four miles northwest of Telegraph, TX. Hardwood slash, brush and grass. Minimal fire activity.

Slope, Florida DOF. Twelve miles east of East Naples, FL. Southern rough. No further information received.

Honey Prarie, Okefenokee NWR. Fifteen miles northeast of Fargo, GA. Southern rough. Active fire behavior. Last report unless significant activity occurs.

Hungryland, Florida DOF. Fourteen miles west of Jupiter, FL. Grass. No further information received. Last report unless significant activity occurs.

Swamp, Florida DOF. Twenty-eight miles west of Ocala, FL. Southern rough. No further information received.

Today's discussion is from the

First Aid / Health Category.

HYPOTHERMIA

Hypothermia occurs when your core body temperature falls below normal. It can easily happen in cold winds or wetness. Hypothermia can also occur in moderately cool temperatures, particularly if coupled with dehydration. People tend to forget to drink on cool, wet days and can get hypothermic even when the temperature stays well above freezing.

- - Symptoms of hypothermia include Slurred speech
 - Weakness and loss of coordination
 - Confusion
 - Irrational behavior

- - Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop)
 - Pale and cold skin
 - Drowsiness – especially in more severe stages
 - Slowed breathing or heart rate

- Your body automatically begins to shiver to warm itself. As your energy is used up to keep warm, you may reach a point where your body will be unable to warm itself. If left untreated, your body will gradually shut down; and you can die.

- You can avoid hypothermia with the following precautions:
 - Guard against dehydration.
 - Avoid fatigue.
 - Avoid cold winds.
 - Take precautions, change out of wet clothes.
 - Be aware of the symptoms and take action upon their onset.

- If you recognize hypothermia, take the following steps:
 - Move the patient to shelter.
 - Remove wet clothes and replace them with warm, dry garments.
 - If the victim is alert, give them food and warm liquids to drink.
