

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, May 8, 2011 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (44 new fires)
New large fires:	4 (*)
Large fires contained:	0
Uncontained large fires: **	16
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Nationally, there are 2 large fire being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 4)

New fires:	20
New large fires:	2
Uncontained large fires:	9
NIMOs committed:	1
Type 1 IMT committed:	2
Type 2 IMT committed:	3

NIMO (Gage) and North Carolina IMT 2 (Hildreth) are assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas State IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Jarhead, Big Cypress National Preserve. IMT 1 (Hughes). Seven miles north of Oasis, FL. Southern rough. Minimal fire activity. Structures threatened.

Pains Bay, Alligator River NWR. IMT 1 (Quesinberry). Nineteen miles south of Manns Harbour, NC. Grass. Active fire behavior.

Honey Prairie, Okefenokee NWR. Georgia State IMT 2 (Kline). Fifteen miles northeast of Fargo, GA. Southern rough. Active fire behavior.

Rock House, Texas Forest Service. Twenty-one miles southwest of Fort Davis, TX. Grass. Minimal fire activity.

Deaton Cole, Texas Forest Service. Thirty-seven miles southwest of Ozona, TX. Brush and grass. Minimal fire activity.

Oasis, Texas Forest Service. Four miles northwest of Telegraph, TX. Hardwood slash, brush and grass. Minimal fire activity.

Slope, Florida DOF. Twelve miles east of East Naples, FL. Southern rough. No further information received.

* **Edwards**, Texas Forest Service. Seven miles southeast of Dickens, TX. Grass. Moderate fire activity.

* **Batch Camp**, Texas Forest Service. Fourteen miles east of Spur, TX. Grass. Moderate fire activity.

Swamp, Florida DOF. Twenty-eight miles west of Ocala, FL. Southern rough. No further information received.

Predictive Services Discussion: Strong winds and low relative humidity across Arizona, New Mexico, western Texas and Colorado will keep fire potential high through Tuesday as a strong low pressure system brings cool, wet weather to the western U.S.

[Link](#) to Predictive Services Outlook products

***Today's discussion is from the
LCES (Lookouts, Communication, Escape
Routes, and Safety Zones) Category.***

Safety Zones (part 2)

Safety Zone(s) are locations where the threatened firefighter may find refuge from the danger. Unfortunately shelter deployment sites have been incorrectly called safety zones. Safety zones should be conceptualized and planned as a location where no shelter is needed. This does not intend for the firefighter to hesitate to deploy their shelter if needed, just if a shelter is deployed the location is not a tree safety zone. Fireline intensity and safety zone topographic location determine safety zone effectiveness.

- How have you determined the distinction between a safety zone and a deployment zone?
- Is refuge in a vehicle, house an acceptable tactic?
- Consider access to the incident. You are often confronted with considerable distances of unburned fuel to cross. How do you manage LCES?
