

**National Interagency Coordination Center
Incident Management Situation Report
Friday, May 13, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (115 new fires)
New large fires:	0 (*)
Large fires contained:	8
Uncontained large fires: **	14
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	6

Nationally, there are 2 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 4)

New fires:	64
New large fires:	0
Uncontained large fires:	8
NIMOs committed:	1
Type 1 IMT committed:	2
Type 2 IMT committed:	3

NIMO (Gage) and North Carolina IMT 2 (Hildreth) are assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Jarhead, Big Cypress National Preserve. Transfer of command from IMT 1 (Hughes) back to local unit will occur today. Seven miles north of Oasis, FL. Southern rough. Moderate fire activity. Structures threatened.

Pains Bay, Alligator River NWR. IMT 1 (Quesinberry). Nineteen miles south of Manns Harbor, NC. Brush. Moderate fire activity.

Honey Prairie, Okefenokee NWR. Georgia IMT 2 (Kline). Fifteen miles northeast of Fargo, GA. Southern rough. Active fire behavior.

Dickens County Complex (two fires), Texas Forest Service. Seven miles southeast of Dickens, TX. Grass. Minimal fire activity.

Iron Mountain, Texas Forest Service. Ten miles northwest of Alpine, TX. Grass. Active fire behavior. Structures threatened.

Schwartz, Texas Forest Service. Twenty miles east of Marathon, TX. Hardwood slash, brush and grass. Active fire behavior.

611 Gas Plant, Texas Forest Service. Thirteen miles northwest of Sweetwater, TX. Grass. No further information received.

Gage Holland, Texas Forest Service. Six miles west of Alpine, TX. Hardwood slash, brush and grass. Minimal fire activity.

Southwest (PL 4)

New fires:	7
New large fires:	0
Uncontained large fires:	5
Type 1 IMT committed:	1
Type 2 IMT committed:	3

Horseshoe 2, Coronado NF. IMT 1 (Reinarz). Fifty miles northeast of Bisbee, AZ. Timber and grass. Moderate fire activity.

Miller, Gila NF. Transfer of command from IMT 2 (Reidy) to IMT 2 (Templin) will occur today. Twenty-five miles north of Silver City, NM. Timber. Moderate fire activity. Structures threatened.

Mayhill, Capitan District, New Mexico State Forestry. IMT 2 (Pierson). Two miles west of Mayhill, NM. Hardwood slash, brush and grass. Active fire behavior. Structures threatened.

Cloverdale 2, Socorro District, New Mexico State Forestry. Forty-five miles south of Animas, NM. Grass. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Queen, Lincoln NF. Thirty-five miles southwest of Carlsbad, NM. Brush. Minimal fire activity.

North Tank, Coronado NF. Fourteen miles east of Nogales, AZ. Timber and grass. Minimal fire activity.

Predictive Services Discussion: Near critical fire weather conditions associated with low relative humidity of 25 to 35 percent and dispersion indices in the 70s will develop across parts of the Florida Panhandle. Scattered showers and thunderstorms will dot much of the eastern third of the U.S. with strong thunderstorms forming along

a cold front from Illinois and Indiana to the Louisiana coast. A weak front over the Pacific Northwest will produce scattered showers and a few thunderstorms across the northern Great Basin and the Northern Rockies.

[Link](#) to Predictive Services Outlook products

Today's discussion is from the
Aviation Category.

[Scenario](#)

Scenarios are situations that can arise on a Wildland Fire or Aviation incident and are meant to add a realistic setting for the application of Today's Safety Discussion.

WORKING WITH HELICOPTER DROPS

Consider the following questions when you have a helicopter with a bucket working in your area:

If the helicopter is a Type 1 increase the distance of standby place from the drop zone.
Use helicopter drops to knock down or secure a fire area that poses a direct imminent threat to escaping control lines or climbing up ladder fuels.

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- What is the turnaround time for the helicopter?

- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Give feedback to the pilot about drop accuracy. Be honest and constructive.
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
