

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 16, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (80 new fires)
New large fires:	1 (*)
Large fires contained:	1
Uncontained large fires: **	11
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

Nationally, there are 2 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 4)

New fires:	58
New large fires:	0
Uncontained large fires:	6
NIMOs committed:	1
Type 1 IMT committed:	1
Type 2 IMT committed:	3

NIMO (Gage) and Southern Area IMT 2 (Dueitt) are assigned to manage large fires and provide support to initial attack operations for the West Branch Operational Area in Texas. Texas IMT 2 (Hannemann) is managing existing and new fires located in Texas state initial attack zones.

Pains Bay, Alligator River NWR. IMT 1 (Quesinberry). Transfer of command from IMT 1 (Quesinberry) to North Carolina IMT 2 (Smith) will occur at end of shift today. Nineteen miles south of Manns Harbor, NC. Brush. Minimal fire activity.

Honey Prairie, Okefenokee NWR. Georgia IMT 2 (Kline). Fifteen miles northeast of Fargo, GA. Southern rough. Moderate fire activity.

Iron Mountain, Texas Forest Service. Ten miles northwest of Alpine, TX. Brush and grass. Minimal fire activity.

Schwartz, Texas Forest Service. Twenty miles east of Marathon, TX. Hardwood slash, brush and grass. Minimal fire activity.

Jarhead, Big Cypress National Preserve. Seven miles north of Oasis, FL. Southern rough. No new information.

Gage Holland, Texas Forest Service. Six miles west of Alpine, TX. Hardwood slash, brush and grass. Minimal fire activity.

Cobalt, Florida Division of Forestry. Nineteen miles east of East Naples, FL. Southern rough. No further information received.

Horseshoe 2, Coronado NF. IMT 1 (Reinarz). Fifty miles northeast of Bisbee, AZ. Timber and grass. Active fire behavior. Residences threatened. Evacuations in effect.

Miller, Gila NF. IMT 2 (Templin). Twenty-five miles north of Silver City, NM. Timber and grass. Moderate fire activity. Residences threatened.

Mayhill, Capitan District, New Mexico State Forestry. IMT 2 (Pierson). Two miles west of Mayhill, NM. Hardwood slash, brush and grass. Minimal fire activity.

Queen, Lincoln NF. Thirty-five miles southwest of Carlsbad, NM. Brush. Minimal fire activity.

* **Tivis**, Capitan District, New Mexico State Forestry. Three miles west of Floyd, NM. Grass. Minimal fire activity.

Predictive Services Discussion: Critical fire weather conditions associated with low relative humidity below 35 percent, high dispersion levels and winds greater than 15 mph will develop over the Florida Panhandle. Critical fire weather conditons are expected across eastern Arizona, southwestern Colorado and western New Mexico due to low relative humidity below 15 percent and winds 20 to 35 mph. A strong Pacific front will bring scattered rain and snow showers and a few thunderstorms over much of the Northwest, the northern Rockies and the northern Great Basin. Meanwhile, a stalled frontal system will keep rain and a few thunderstorms across much of the Eastern Seaboard from Maine to the Carolinas. The center of the country will remain mild and generally dry.

Today's discussion is from the
Weather / Fire Behavior Category.

NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area.

● The Pocket Card provides:

- A general indicator of the potential fire danger for a given rating area.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures.

● Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://fam.nwcg.gov/fam-web/pocketcards/default.html/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the Pocket Card for site specific fire behavior predictions and fireline actions or without an interpretive briefing.
- Review definitions and implications of ERC and BI values.
