

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, November 10, 2011 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (73 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	0
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 8 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Surface high pressure will dominate across most of the US, bringing generally cool and dry conditions to much of the nation. It will also produce breezy offshore conditions and lower relative humidity across the coastal ranges and foothills of southern California, mainly in favored passes. A lee trough will develop along the northern Rockies, increasing winds over the Dakotas and the high plains of Montana and Wyoming. Breezy and dry conditions will also affect the deep south over northern Florida and southern Georgia. Scattered rain and snow showers will dot the Great Lakes region to New England.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Fireline Safety Category

FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST

Standard Fire Order #10 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.
- Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.
- Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.
- Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
 - Post lookouts.
 - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
 - Do you have established trigger points?
