Predictive Services Discussion: High pressure over the central US will keep most of the nation in fair conditions with mild to cool temperatures. A storm system approaching the Northwest will bring scattered rain with snow at higher elevations to much of Washington, Oregon and northern Idaho. A cold front moving through the Southeast will produce scattered showers and thunderstorms from the eastern Gulf States to New England. Gusty winds will develop across the upper Mississippi Valley to central Texas.

Today's discussion is from the
Fireline Safety Category.

OPERATIONAL BRIEFINGS

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

● Situation:

- Fire name, location, map orientation, other incidents in the area
- Terrain influences
- Fuel type and conditions
- Fire weather (previous, current, and expected)
- Fire behavior (previous, current, and expected)

● Mission/Execution:

- Command (Incident Commander/immediate supervisor)
- Leader's intent
- Specific tactical assignments
- Contingency plans

● Communications:

- Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
- Medevac Plan

● Service/Support:

- Other resources that may be working adjacent to you and those available to order
- Aviation operations
- Logistics (e.g., transportation, supplies, equipment)

● Risk Management:

- Identify known hazards and risks
- Identify control measures to eliminate hazards and reduce risk
- Identify trigger points for disengagement or reevaluation of operational plan
