

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, September 4, 2011 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (150 new fires)
 New large fires: 5 (*)
 Large fires contained: 7
 Uncontained large fires: ** 32
 Area Command Teams committed: 0
 NIMOs committed: 3
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 11

Nationally, there are 70 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

A NIMO (Kleinman) is assigned to provide support to existing and new fires in Texas.

*** Ferguson**, Wichita Mountains NWR. IMT 1 (McGowan). Twelve miles northeast of Cache, OK. Timber. Active fire behavior. Evacuations in effect.

101 Ranch, Texas Forest Service. Eight miles west of Palo Pinto, TX. Grass. Moderate fire activity.

Lateral West, Great Dismal Swamp NWR. Nine miles southeast of Suffolk, VA. Timber. Smoldering.

Hornets Tank, Texas Forest Service. Eleven miles northwest of Turkey, TX. Grass. Moderate fire activity.

Legacy, Texas Forest Service. Eight miles northeast of Forsan, TX. Grass. No new information. Last report unless new information is received.

Jack Mountain, Texas Forest Service. Five miles south of Gatesville, TX. Grass and timber. No new information.

Picket Run, Texas Forest Service. Seven miles south of Bowie, TX. Grass. Moderate fire activity.

*** Ocean Bay**, National Forests in Florida. Twenty-two miles northeast of Lake City, FL. Southern rough. Active fire behavior.

Crab Prairie, Texas Forest Service. Thirty-one miles northeast of College Station, TX. Timber. Minimal fire activity. Reduction in acreage due to more accurate mapping.

Bundy Ross, Texas Forest Service. Seven miles southeast of Telegraph, TX. Juniper, brush and grass. No new information.

Horseshoe Bend, Texas Forest Service. Ten miles south of McGregor, TX. Grass. Moderate fire activity.

3457 Road, Texas Forest Service. Eight miles northwest of Poolville, TX. Grass. Moderate fire activity. Reduction in acreage due to more accurate mapping.

Cedar Truck Complex, Texas Forest Service. One mile west of Fort McKavett, TX. Grass. Minimal fire activity.

Rick Ranch, Texas Forest Service. Twenty-four miles west of Junction, TX. Grass. Moderate fire activity.

Kings Creek, Arkansas Forestry Commission. Three miles southeast of Mansfield, AL. Timber litter. No new information. Last report unless new information.

Johnson Creek, Texas Forest Service. Two miles southwest of Price, TX. Timber. Moderate fire activity.

Predictive Services Discussion: Tropical Storm Lee is expected to produce heavy rain and windy conditions over the Gulf Coast and Lower Mississippi Valley. A cold front extending from the Great Lakes to Texas will produce scattered showers and thunderstorms. Dry and windy conditions will continue over much of Texas, Oklahoma and southern Kansas. Widely scattered thunderstorms will develop over the central and southern Rockies, parts of the Southwest and extend into the Great Basin late evening. Temperatures will generally warm in the West while the central and northern Plains remain in fall-like conditions.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
LCES (Lookouts, Communication, Escape Routes, and
Safety Zones) Category.

ESCAPE ROUTES (part 3)

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following during discussion of escape from possible entrapment.

- Have a plan that includes trigger points!
 - **Trigger Point:** An observable event that triggers a pre-determined action. Example: Temperature reaches 98 Degrees and RH goes into single digests the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Has access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape time will be short. Describe considerations you might make in this situation such as:
 - Maintain control of all critical equipment such as PPE and radio... jettison gear that will not aid in your escape!
 - Maintain contact with all other crewmembers!
- Describe your vision of a good safely zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to and safety zones and deployment areas.
