

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 23, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (90 new fires)
New large fires:	2 (*)
Large fires contained:	1
Uncontained large fires: **	11
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

Nationally, there are 73 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and two MAFFS from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard) and support personnel have been activated and will operate from Austin, Texas. The two MAFFS and support personnel from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard) assigned in Austin were released yesterday.

Southern Area (PL 3)

New fires:	30
New large fires:	0
Uncontained large fires:	6
NIMOs committed:	1
Type 1 IMTs committed:	2

A NIMO (Kleinman) and two Type 1 Incident Management Teams (Opliger and Morcom) are assigned to provide support to existing and new fires in Texas.

Bastrop County Complex (two fires), Texas Forest Service. Six miles northeast of Bastrop, TX. Southern rough. Creeping. Precipitation occurred over the fire area yesterday.

Indian Prairie, Florida DOF. Three miles southeast of Buckhead, FL. Southern rough. No further information received.

Copper Breaks, Texas Forest Service. Nineteen miles northwest of Crowell, TX. Grass. No further information received.

South 104, Texas Forest Service. Twelve miles southwest of Quannah, TX. Grass. Active fire behavior.

Perry Ranch, Texas Forest Service. Sixteen miles southwest of Iraan, TX. Grass. Creeping and smoldering.

CMX – Campbell County

Predictive Services Discussion: Warmer than normal weather will continue over the West while surface high pressure keeps cool Fall conditions over the central and eastern parts of the nation. A cold front moving through the East will bring scattered showers and thunderstorms to the east coast states and showery conditions to the Great Lakes region.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Weather / Fire Behavior Category

[Scenario](#) (Interactive Cloud Poster: loads slow)

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking)
