

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 28, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (50 new fires)
 New large fires: 1 (*)
 Large fires contained: 3
 Uncontained large fires: ** 8
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 4
 Type 2 IMTs committed: 1

Nationally, there are 76 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and two MAFFS from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard) and support personnel have been activated and are operating from Austin, Texas.

Southern Area (PL 3)

New fires: 20
 New large fires: 1
 Uncontained large fires: 4
 NIMOs committed: 1
 Type 1 IMTs committed: 3

A NIMO (Kleinman) is assigned to provide support to existing and new fires in Texas. Transfer of command from IMT 1 (Opliger and Morcom) to IMT 1 Quesinberry will occur today.

Bastrop County Complex (two fires), Texas Forest Service. Six miles northeast of Bastrop, TX. Southern rough. Creeping and smoldering.

Shackelford, Texas Forest Service. Fifty-five miles southwest of Sanderson, TX. Grass. No new information.

* **Mitchell 3**, Texas Forest Service. Thirty-four miles southwest of Ozona, TX. Grass. Moderate fire activity.

HTF - Humboldt-Toiyabe NF

Predictive Services Discussion: Surface high pressure will keep mild weather over the Northwest, northern Rockies and northern Plains while an upper ridge continues the above normal temperatures for the Great Basin and the Southwest. An upper low over the Midwest will produce showers and thunderstorms around the Great Lakes and Ohio Valley while a lingering front will produce showers and thunderstorms along East and Gulf coasts. Warm and dry conditions will remain over Texas.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
First Aid / Health Category.**

Burn Protocols

Burn injuries are often difficult to diagnose and may continue to worsen if they do not receive immediate, specialized treatment. The initial evaluation and treatment of these burns often happens in rural medical facilities with limited experience in burn injury care. In the past, this has resulted in evaluation and treatment that did not provide the best care to injured firefighters. Therefore, victims with either severe burns or burns that meet any of the below criteria should be immediately referred and transported to a regional burn center.

- Burn injury criteria identified by the American Burn Association as warranting immediate referral to an accredited burn center.
 - Partial thickness burns (second degree) involving greater than 5% Total Body Surface Area.
 - Burns involving the face, hands, feet, genitalia, perineum, or major joints.
 - Third-degree burns of any size are present.
 - Electrical burns, including lightning injury are present.
 - Inhalation injury is suspected.
 - Burns are accompanied by traumatic injury (such as fractures).
 - Individuals are unable to immediately return to full duty.
- It is imperative that action is expeditious, as burn injuries are often difficult to evaluate and may take 72 hours to manifest themselves. When there is any doubt as to the severity of the injury, the required action is to immediately refer and transport the employee to a regional burn center.
- To ensure that Workers Compensation assistance is provided an agency administrator, or designee, for the incident needs to coordinate with the firefighter's home unit.
- Do you know the location of the closest regional burn center?
 - <http://www.blm.gov/nifc/st/en/prog/fire/im.html>
