

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 29, 2011 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (49 new fires)
New large fires:	0 (*)
Large fires contained:	1
Uncontained large fires: **	8
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	0

Nationally, there are 77 large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and two MAFFS from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard) and support personnel have been activated and are operating from Austin, Texas.

Southern Area (PL 3)

New fires:	4
New large fires:	0
Uncontained large fires:	5
NIMOs committed:	1
Type 1 IMTs committed:	1

A NIMO (Kleinman) and an IMT 1 (Quesinberry) are assigned to provide support to existing and new fires in Texas.

Bastrop County Complex (two fires), Texas Forest Service. Six miles northeast of Bastrop, TX. Southern rough. Creeping and smoldering.

Shackelford, Texas Forest Service. Fifty-five miles southwest of Sanderson, TX. Grass. No new information. Last report unless new information is received.

South 104, Texas Forest Service. Previously reported incident. Eleven miles southwest of Quanah, TX. Grass. Active fire behavior.

Mitchell 3, Texas Forest Service. Thirty-four miles southwest of Ozona, TX. Grass. Minimal fire activity.

SRF – Six Rivers NF

Predictive Services Discussion: Above normal temperatures will continue over the West while mild fall conditions spread through the Plains states. A cold front stretching from the Midwest to north Texas will produce scattered showers and thunderstorms over the Great Lakes region, the Ohio Valley and New England. Warm, humid conditions will cover the Southeast.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Miscellaneous Category.

Radio Narrow banding

The ability to have positive, reliable communication is one of the most important safety considerations we have in Wildland fire. As we are forced to adapt to technological changes, maintaining good radio communications becomes more complex and requires a heightened level of skill and awareness from all firefighters. The following are some facts and suggestions that may make radio communications easier

- Federal Agencies have been congressionally mandated to narrowband their frequencies by January 1, 2005. State and municipal agencies will not have to follow suit until the year 2013. For firefighters trying to determine if a frequency will be narrow banded or not, this means that it is probably a good bet that Federal frequencies (those frequencies between 162.0000 and 174.0000 Mhz) are.
- Operating your radio in the wideband mode while working in a narrowband environment may cause radio communication problems for everyone working on that channel. The symptoms may range from distorted transmissions to no transmission at all.
- Before we were mandated to work in narrowband, frequencies were listed with just three digits past the decimal point. It is imperative that we now convey frequencies with four digits past the decimal point, for example 168.xxxx
- Some firefighters mistakenly believe that if they simply punch in four numbers past the decimal point, the channel will then be narrow banded. This is not true! Each channel must be programmed specifically to operate in wideband or narrowband. Narrowband programming instructions for most handheld radios can be found at www.fireradios.net
Another website that has programming instructions as well as pocket cards that can be printed is: www.fs.fed.us/fire/niicd/documents
- Check your frequency guides, plans and maps to see which mode the frequencies are supposed to be operating on. If these don't have the information you need, find it and make pen and ink notes for yourself.
- If available, have a radio technician check your radio to ensure you are operating in the proper mode on the assigned frequencies.
- Discuss the narrow/wide band concept with all firefighters, managers and pilots.
