

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, August 5, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (148 new fires)
New large fires:	10 (*)
Large fires contained:	3
Uncontained large fires: **	46
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	8

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel from the 146th Airlift Wing, Channel Islands (California Air National Guard), and the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve) are supporting wildland fire suppression operations out of Boise, ID.

Northern Rockies Area (PL 3)

New fires:	10
New large fires:	1
Uncontained large fires:	18
Type 2 IMTs committed:	5

Rosebud Creek Complex (6 fires), Eastern Land Office, Montana DNR. IMT 2 (Benes). Sixty miles southwest of Miles City, MT. Ponderosa pine, brush and grass. Active fire behavior with single and group tree torching. Structures threatened. Reduction in acreage due to more accurate mapping.

Sarpy Hills Complex (6 fires), Crow Agency, BIA. IMT 2 (Fry). Eighteen miles northwest of Crow Agency, MT. Timber. Creeping and smoldering. Numerous structures threatened.

Elbow Pass Complex (3 fires), Lewis & Clark NF. IMT 2 (Hall). Twenty-five miles southwest of Augusta, MT. Timber. Creeping and smoldering. Structures threatened.

Butler, Lolo NF. Transfer of command from IMT2 (Kusicko) back to local unit will occur today. Twenty-seven miles northwest of Frenchtown, MT. Timber. Smoldering.

Falls Point, Lolo NF. IMT 2 (Hutton). Twenty-seven miles east of Seeley Lake, MT. Timber. Creeping and smoldering with single and group tree torching. Area and trail closures in effect.

Chrandal Creek, Bitterroot NF. Thirty-two miles south of Darby, MT. Timber. Smoldering.

Prisoner Lake, Flathead NF. Twenty-five miles east of Condon, MT. Timber. Creeping and smoldering. Trail closures in effect.

* **Salamander**, Bitterroot NF. Forty miles southwest of Conner, MT. Timber. Creeping and smoldering with isolated torching. Last report unless significant activity occurs.

Predictive Services Discussion: Widely scattered thunderstorms will move through northern California, northern Nevada, southeastern Oregon and southwestern Idaho during the day. Scattered showers and thunderstorms will also develop across the Four Corners states. A cold front will move through the eastern U.S., producing showers and thunderstorms from New England to eastern Texas.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from
"This Day in History"

"This Day in History" is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

The Mann Gulch Fire - August 5th, 1949

Summary: Lightning started many fires on the Helena National Forest August 4th, 1949 including one near the top of a ridge between Meriwether and Mann Gulches. At 12:55pm August 5th, the fire was observed at 6 acres. At 1:30 the call went out for smokejumpers from the Missoula jumpbase. By the time the jump plane flew over at 3pm the fire was 60 acres. The crew jumped and are scattered by a nearby thunder cell.

The crew gathers at the bottom of the gulch up-canyon of the fire. Jumper Foreman goes to scout the fire and meets up with a fire guard working alone near the head of the fire. Observing increased fire activity, the decision is made to start from the toe. While hiking to the toe, the foreman noted that there was fire below them in the gulch and that it had crossed to the other side of the canyon blocking their ability to escape to the river. They reversed direction and headed up toward the NW ridge. The fire is 500 feet behind them crowning in timber and doghair thickets.

The foreman knows that they will not outrun the fire and starts to burn off some grass for a "refuge". He gives the order for his crew to come into the black with him. The foreman stayed in his black and survived the fire passing over. It is not clear how many of the crew heard the orders over the roar of the fire or understood what the foreman was trying to do (burning out was neither taught nor common practice at this time). The crew continued running up the steep slope for the ridge. Two made it to safety in rocks at the top. 5:56pm marks the time on one firefighter's watch that stopped when the 15 Missoula Smokejumpers and one Meriwether Fire Guard were burned over. Only 5 would survive the blow-up. 2 would die from their burns the next day.

This Day in Wildland Fire History is dedicated to all those at Mann Gulch August 5th, 1949.

Predicted Fire Danger was "low" but readings from a nearby ranger station were RH=22%, fuel sticks = 5%, and wind=16mph indicating more severe fire danger. No weather was recorded at the fire, but steady SW winds were observed at the time of the jump. The Gulch runs SW down to the Missouri River. Also note the thunder cell that was in the area.

- Open your IRPG to page 1. Based on the above information coupled with the increase in fire size, use the Risk Management Process and the map (right) to discuss some of the actions you will take to ensure crew safety: as the FFT2, squad boss, crew boss, etc.

Based on initial aerial size-up, the strategy was to hold the fire on the ridge by anchoring the head of the fire and flanking down both sides to the toe. The fire was noted as "appearing relatively quiet".

- Discuss other tactics that your crew could use if presented with a similar situation. Look at the different options available at different steps of the initial attack.

Though his ability as a firefighter was well respected by his peers, the Foreman was not known by this young group of smokejumpers.

- When we find ourselves in this position (such as a Crew boss assignment) what can we do to create and encourage crew cohesion?
