

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, July 3, 2012 – 0530 MT
National Preparedness Level 4**

National Fire Activity

Initial attack activity:	Light (129 new fires)
New large fires:	8 (*)
Large fires contained:	10
Uncontained large fires: **	44
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	5
Type 2 IMTs committed:	13

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

A MAFFS C-130 air tanker from the 145th Airlift Wing (North Carolina Air National Guard) crashed July 1 while working on the White Draw fire north of Edgemont, SD. Four crew members on board were fatally injured. The firefighting community extends its condolences to the families and friends of the deceased.

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), the 146th Airlift Wing, Channel Islands (California Air National Guard), and the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Colorado Springs, CO, and Cheyenne, WY.

Rocky Mountain Area (PL 5)

Oil Creek, Wyoming State Forestry. Washington IMT 2 (LaFave). One mile west of Newcastle, WY. Timber, brush and grass. Extreme fire behavior with short crown runs, torching and spotting. Numerous residences and power lines threatened. Evacuations in effect.

Arapaho, Albany County. IMT 1 (Morcom). Twenty-eight miles northeast of Wheatland, WY. Timber. Torching and spotting. Numerous structures threatened. Evacuations and road closures in effect.

Squirrel Creek, Medicine Bow NF. IMT 1 (Opliger). Three miles west of Woods Landing, WY. Timber. Extreme fire behavior. Numerous structures threatened. Evacuations in effect.

White Draw, Black Hills NF. IMT 2 (Fry). Four miles north of Edgemont, SD. Timber. Active fire behavior with short crown runs. Structures threatened. Evacuations in effect.

Waldo Canyon, Pike and San Isabel NF. IMT 1 (Harvey). Three miles west of Colorado Springs, CO. Timber, hardwood slash and brush. Creeping and smoldering. Numerous structures, communication sites and the U.S. Air Force Academy threatened.

Pine Ridge, Grand Junction Field Office, BLM. IMT 1 (Hahnenberg). Ten miles north of Grand Junction, CO. Timber, brush and grass. Creeping, smoldering and interior torching.

*** Parker Peak**, Black Hills NF. Three miles south of Minnekahta, SD. Timber. Moderate fire activity with occasional single tree torching. Structures threatened.

Flagstaff, Boulder County. One mile southwest of Boulder, CO. Timber. Creeping and smoldering with occasional interior torching.

Little Sand, San Juan NF. Transfer of command from NIMO (Bennett) back to the local unit will occur today. Thirteen miles northwest of Pagosa Springs, CO. Timber. Light fire activity. Structures threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

Weber, San Juan District, BLM. Transfer of command from IMT 2 (Lowe) back to the local unit occurred yesterday. One mile south of Mancos, CO. Timber and brush. Smoldering.

Index Creek, Shoshone NF. Four miles southeast of Cooke City, MT. Timber. Creeping and smoldering.

*** Highlands**, South Dakota DOF. Fourteen miles southeast of Newcastle, WY. Timber. Creeping and smoldering. Residences threatened.

Camp 5, Nebraska NF. Twenty-two miles southeast of Halsey, NE. Timber. Smoldering. Evacuations in effect.

Otter Creek/Upper Bee, Wind River/Bighorn District, BLM. Twenty miles southeast of Tensleep, WY. Juniper and brush. No further information received.

Predictive Services Discussion: A cold front will cross the Northwest into the northern Rockies and the northwestern Great Basin. Scattered showers and thunderstorms will move across the Southwest and into Colorado. Hot and dry conditions will continue in much of the Great Basin and the far southwest deserts while cooler weather moves into the Northwest. Scattered showers and thunderstorms will develop in the northern Plains and around the Great Lakes. Hot and humid weather will remain over the Southeast where scattered thunderstorms will develop in the afternoon. In Alaska, scattered showers and thunderstorms will develop around the state with rainfall increasing across the central and eastern Interior

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from
"This Day in History"

"Lessons Learned" serve as brief summaries of powerful learning opportunities. You can use these summaries as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, and your unit.

Part I - South Canyon Fire, Colorado, 1994 (A Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colorado, lightning ignites a Bureau of Land Management fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The fire, paralleled by two deep canyons, is initially believed to have "little chance" to spread. The past two days, lightning has started 40 new fires on this BLM District. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Visible from Interstate 70 and nearby residential areas, the public becomes concerned. Some initial attack resources are assigned. Between July 3-6, the fire grows to approximately 2,000 acres. On July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several 100-foot flame-length rapid runs within the existing burn—in dense, highly flammable Gambel oak. Fourteen firefighters perish as they try to outrun the flames. The remaining 35 firefighters survive either by escaping down a deep drainage or by seeking a safety area and deploying their fire shelters.

July 3 – Summary of Activities

The Grand Junction BLM District is in very high to extreme fire danger. Ninety percent of its firefighting resources are committed to more than 40 new fires started in the previous 2 days.

A red flag warning is issued for dry lightning. Strong winds hamper the effective use of fire suppression aircraft.

One load—eight—smokejumpers, an air tanker, and lead plane are requested.

An engine crew arrives on scene. Its foreman's initial size-up informs: fire is inaccessible; two flaming trees visible, low spread potential, steep slopes. Until more resources can be obtained, it is recommended that the fire be observed.

Fire Control Officer requests more South Canyon Fire resources from the Western Slope Fire Coordination Center.

**Lessons Learned
Discussion Points**

Your fire crew is now dispatched to the South Canyon Fire. Given the following circumstances, what would you do to ensure that everyone is safe:

- Extreme fire danger due to condition of the fuels,
- Limited resources,
- Difficult terrain,
- Red flag warning for dry lightning and high winds.
