

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Thursday, July 12, 2012 – 0530 MT**  
**National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Moderate (269 new fires)
New large fires:	12 (*)
Large fires contained:	11
Uncontained large fires: **	38
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	8

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Six MAFFS C-130 aircraft and support personnel have been activated to support wildland fire suppression operations. The MAFFS are from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (US Air Force Reserve), the 146<sup>th</sup> Airlift Wing, Channel Islands (California Air National Guard), and the 153<sup>rd</sup> Airlift Wing, Cheyenne (Wyoming Air National Guard). The aircraft are operating out of Hill Air Force Base, UT, and Boise, ID.

**Eastern Great Basin Area (PL 4)**

New fires:	37
New large fires:	9
Uncontained large fires:	18
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

\* **Rhyolite**, Salt Lake District, BLM. One mile east of Tacoma, NV. Timber. Running fire with torching and spotting. Structures threatened.

\* **Meadow**, Salt Lake District, BLM. Twelve miles southwest of Moulten, ID. Juniper and brush. Extreme fire behavior with torching and spotting. Structures threatened.

\* **Stout**, Boise District, BLM. Eleven miles north of Glenns Ferry, ID. Brush and grass. Extreme fire behavior. Structures threatened.

\* **Knox**, Power County. Fourteen miles east of Rockland, ID. Timber, brush and grass. Backing fire with short runs.

\* **Rooster Rock**, Fort Hall Agency, BIA. Eleven miles southwest of Pocatello, ID. Juniper and brush. Running fire.

\* **Cedar Butte WSA**, Idaho Falls District, BLM. Seventeen miles northwest of Blackfoot, ID. Brush and grass. Running fire.

\* **Hobble**, Arizona Strip District, BLM. Twenty miles southeast of Mesquite, NV. Pinyon pine and juniper. Running fire. Structures threatened.

\* **Avelene**, Idaho Department of Lands. IMT 1 (Lund). Ten miles southwest of Idaho City, ID. Timber. Backing fire with torching. Numerous structures threatened. Road closures in effect.

**Seeley**, Manti-Lasal NF. Transfer of command from IMT 2 (Philbin) back to the local unit will occur tomorrow. Fifteen miles northwest of Huntington, UT. Timber. Creeping and smoldering. Evacuations in effect.

**Fontenelle**, Bridger-Teton NF. Transfer of command from NIMO (Houseman) to IMT 2 (Ourada) will occur today. Eighteen miles west of Big Piney, WY. Timber. Moderate fire activity with single tree torching. Road closures in effect.

**Kinyon Road**, Twin Falls District, BLM. IMT 2 (Adell). Eight miles southwest of Castleford, ID. Brush and grass. Smoldering. Structures threatened.

**Jacks**, Boise District, BLM. Twenty-one miles southwest of Bruneau, ID. Brush and grass. Active fire behavior. Natural gas pipeline threatened.

**Midway**, Idaho Falls District, BLM. Five miles southwest of Atomic City, ID. Brush and grass. Running fire.

**Little Birch Creek**, Twin Falls District, BLM. Eight miles south of Oakley, ID. Brush. Smoldering.

**C Fire**, Idaho Department of Lands. IMT 2 (Sommer). Twelve miles east of Donnelly, ID. Timber. Torch and short-range spotting.

**Clay Springs**, Central Area, Utah DOF. Four miles south of Oak City, UT. Timber, brush and grass. Major power lines and gas pipelines threatened. Torch and smoldering. Reduction in acreage due to more accurate mapping.

**Wolf Den**, Vernal District, BLM. Forty miles south of Vernal, UT. Pinyon pine, juniper and brush. Torch. Reduction in acreage due to more accurate mapping.

**Bear Cub**, Bridger-Teton NF. Twenty-two miles east of Moran, WY. Timber. No new information.

SA	10	2,373	4	13	1	272
Total	33	178,268	12	31	5	690

This table does not include fires reported in the large fire section of this report. Updated weekly.

**Predictive Services Discussion:** Scattered showers and thunderstorms will spread from the Front Range of the Rockies to the Great Basin. Isolated thunderstorms will also develop in the southern mountains of California. Temperatures will remain much above normal for most of the West. In the East, scattered thunderstorms will form in the afternoon across much of the Southeast and along a cold front in the northern Plains. Alaska will see rain increase across the south with isolated thunderstorms over the Interior.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the  
Aviation Category.

## HELICOPTER PERFORMANCE AND EFFECTIVENESS

Certain helicopter missions push the limits of the aircraft's performance capabilities. Items that reduce the effectiveness and increase the risk of the mission include weight, temperature, altitude, and visibility.

- Helicopter missions that transport external loads increase risk.
- Helicopters performance/lift capabilities decrease as temperature and/or altitude increase. Be watchful of conditions that are High, Hot and Heavy!
- All helicopters have different maximum performance capabilities, so be aware of the capabilities of the specific helicopter that you are working with.
- Low-level helicopter operations often occur in heavy smoke where hazards (e.g., trees, snags, antennas, visibility, turbulence, and other aircraft) increase the risk level significantly.
- Determine the risk level for every mission. Is the risk level acceptable? Can the risk be mitigated? If the risk is not acceptable or it cannot be mitigated, then the mission should not be flown.
- A large part of the success of a helicopter mission is the result of good communications between the pilot and the user on the ground.
- Accurate target and hazard descriptions are essential to a safe mission. Locate this information and relay it to the pilot. Things to consider in the target description include:
  - Have you considered what the target would look like from the air?
  - Are you located where the pilot can see you?
  - Do you have a signal mirror?
  - Are you using cardinal directions or clock directions in relation to the track of the aircraft?
  - What is the wind direction? Provide this information to the pilot.
  - Are all firefighters clear of the drop area?
  - Is there a safer way to carry out an effective suppression action?
