

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 12, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (125 new fires)
New large fires:	4 (*)
Large fires contained:	4
Uncontained large fires: **	16
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	7
New large fires:	1
Uncontained large fires:	7
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

Little Bear, Lincoln NF. IMT 1 (Reinarz and Turman). Five miles northwest of Ruidoso, NM. Timber and grass. Active fire behavior with group tree torching. Communities, communication site and ski resort threatened. Evacuations in effect.

Whitewater-Baldy, Gila NF. NIMO (Houseman). Fifteen miles east of Glenwood, NM. Timber. Moderate fire behavior. Structures threatened.

257, Tonto NF. IMT 2 (Templin). Four miles south of Superior, AZ. Brush. Active fire behavior. Structures and powerlines threatened.

* **Wide Ruins 2**, Navajo Agency, BIA. Seventeen miles northwest of Chambers, AZ. Hardwood litter. Active fire behavior with torching and short-range spotting.

Gladiator, Prescott NF. Started on state land one mile east of Crown King, AZ. Chaparral. Smoldering.

Montezuma, Papago Agency, BIA. Twenty miles southeast of Sells, AZ. Timber and grass. Smoldering.

Bear Springs, Santa Fe NF. Five miles east of Ponderosa, NM. Brush and hardwood slash. Minimal fire activity.

MIS – Michigan DNR

Predictive Services Discussion: A broad upper trough will remain over the West. Warm and dry conditions will continue over the Southwest and Great Basin. Local windy conditions will develop across parts of the Wyoming and Colorado Front Range, while isolated thunderstorms form in eastern Colorado and Wyoming. Surface high pressure will drop into the Plains, pushing a cold front through the Mississippi Valley and the Great Lakes. Showers and thunderstorms will cross much of the eastern third of the U.S. In Alaska, isolated to widely scattered thunderstorms will form along the south coast, with warmer temperatures and a few dry thunderstorms over the Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the
Hazard Tree Category.

HAZARD TREE – NO WORK ZONES (NWZ)

Knowing when the exact time a given hazard tree (or compromised section) will fail is an extremely difficult, and is, in many cases, an unpredictable task. Given this fact, we need to manage firefighters' exposure to these hazards by creating a safe work area or NWZ. The size and extent of the NWZ must be determined by onsite conditions, such as terrain, lean, active fire in the tree and adjoining trees.

When an identified hazardous tree cannot be felled, then perform an assessment of which areas have too high a risk, and post a lookout to warn the personnel to stay clear of these areas while working in adjacent areas. If hazard still exists before leaving the area, flag the NWZ so that personnel entering the area will be able to recognize the hazard. Use the following failure zone illustrations as examples to help manage firefighter exposure to these identified hazards. Also remember to include the possibility of the "Domino Effect" to surrounding trees.

#1 – $1\frac{1}{2}$ X Height of snag, #2 – $1\frac{1}{2}$ X trunk-to-branch-tip distance #3 – $1\frac{1}{2}$ X length of dead top.
