

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 22, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity: Light (127 new fires)
 New large fires: 5 (*)
 Large fires contained: 6
 Uncontained large fires: ** 15
 Area Command Teams committed: 0
 NIMOs committed: 1
 Type 1 IMTs committed: 3
 Type 2 IMTs committed: 4

** Uncontained large fires include only fires being managed under a full suppression strategy.

SQF – Sequoia NF

KRN – Kern County FD

Predictive Services Discussion: An upper trough over the Northwest will produce strong winds across the Great Basin and central Rockies, which along with low relative humidity will create critical fire weather conditions. Hot and dry weather will remain over the Southwest, with isolated thunderstorms developing over southern Arizona and higher elevations of New Mexico. Cool and showery weather will move into the Pacific Northwest. High pressure will drop into the eastern half of the nation. In Alaska, warm and dry conditions will remain, with isolated showers and thunderstorms over the southeastern Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the NEW
Fireline Leadership Category.**

Leaders Intent

Introduction:

In fast-moving, dynamic situations, top-level decision makers cannot always incorporate new information into a formal planning process and redirect people to action within a reasonable timeframe.

We provide leader's intent so people closest to the scene of action can adapt plans and exercise initiative to accomplish the objective when unanticipated opportunities arise or when the original plan no longer suffices.

Leaders' intent is a crucial element of effective operations because it reduces internal friction and empowers subordinates – even when chaotic conditions prevent the chain of command from communicating effectively.

- Leader's intent is a clear, concise statement about what people must do to succeed in their assignments. It delineates three essential components:
 - Task - what is the objective or goal of the assignment?
 - Purpose – why the assignment needs to be done.
 - End state – how the situation should look when the assignment is successfully completed.
- Within the framework of the defined end state, leaders can develop plans that include incident objectives, priorities, strategies, trigger points, and contingency plans.

Discussion Points

- How were you most recently provided leader's intent?
- Describe a situation where leader's intent was utilized to adapt and achieve the desired end state.
- Describe a situation where leader's intent was not clear.
- Discuss how to gain leaders intent if it is not initially provided.
