

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, May 10, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (71 new fires)
 New large fires: 0 (*)
 Large fires contained: 0
 Uncontained large fires: ** 5
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

Nationally there are no large fires being managed to achieve multiple objectives.

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Southern Area (PL 2)

New fires: 45
 New large fires: 0
 Uncontained large fires: 4

County Line, National Forests in Florida. Twenty-five miles north of Lake City, FL. Southern rough. Smoldering.

Cinco de Mayo, Florida Forest Service. Twenty-four miles northwest of Coral Springs, FL. Grass. No new information.

Alley South, Florida Forest Service. Twenty-five miles northwest of Pembroke Pines, FL. Grass. No new information. Last report unless new information is received.

Sand Hill, Florida Forest Service. Two miles southeast of Fellsmere, FL. Southern rough. No new information.

Southwest Area (PL 2)

New fires: 12
New large fires: 0
Uncontained large fires: 1

School Canyon, Coronado NF. Sixteen miles southwest of Sierra Vista, AZ. Grass. Smoldering. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

Predictive Services Discussion: High pressure will build across the eastern U.S. bringing generally warm and dry conditions from the Great Lakes to the Gulf Coast. Scattered showers will move through New England while scattered showers and thunderstorms develop from southern New Mexico to south Texas. A cold front will push across the northern Rockies and the Great Basin, dropping temperatures from the Northwest coast to the central Rockies. Scattered rain and snow showers will move through the northern Rockies and gusty winds will develop behind the front. Warm weather will continue in the Southwest. In Alaska, scattered rain will develop along the southern coast with snow showers moving across the interior. Cold and cloudy conditions will continue elsewhere.

Predictive Services Outlook products: <http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**Today's discussion is from the
Miscellaneous Category.**

HAZARD MITIGATION THROUGH RISK MANAGEMENT

“Risk Management doesn’t get in the way of doing the mission – *it is the way we do the mission.*” The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● **Step 1—Situational Awareness:**

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● **Step 2—Hazard Assessment:**

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● **Step 3—Hazard Control:**

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.

● **Step 4—Decision Point (decision to accept or not accept the risk(s) associated with an action):**

- Consider whether controls are in place for identified hazards, whether selected tactics are based on expected fire behavior and if instructions have been given and understood.
- Make certain the decision is made at the appropriate level; if not, then elevate to a higher level.
- Reject the action if the risk is unacceptable.

● **Step 5—Evaluation:**

- Ensure controls are implemented and accomplished to standards.
- Supervise/evaluate effectiveness of controls and decisions. Stay on top of the situation and adjust risk controls as necessary.
- Anticipate consequences of decisions; if controls do not work, determine problem and derive a better solution.
- Adjust actions as the situation changes; maintain situational awareness at all times.
- Maintain feedback line.
