

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, May 27, 2012 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (85 new fires)
 New large fires: 2 (*)
 Large fires contained: 3
 Uncontained large fires: ** 10
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 4
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Bear River Area – Utah DNR

Predictive Services Discussion: An upper low will drift across the Great Basin to the northern Rockies. Gusty winds will decrease over the southern Great Basin and the Southwest but critical fire weather conditions from winds and low relative humidity will continue in some parts of eastern Arizona and New Mexico. Scattered showers will continue over the northern Great Basin with rain moving across Montana, Wyoming and the Dakotas. Warm and humid conditions will hold in the eastern half of the U.S. while scattered rain moves across the Great Lakes and New England. In Alaska, rain will decrease along the Gulf coast while scattered showers and a few thunderstorms move over the central and eastern Interior.

**Today's discussion is from the
Miscellaneous Category.**

CHAINSAW SAFETY

Chainsaw safety is every saw operator's job.

- Always wear proper P.P.E. when handling or working around chainsaws.
 - Eye protection- approved goggles or safety glasses (no sunglasses)
 - Chainsaw Chaps- proper size and length
 - Gloves-proper size
 - Long sleeve shirt-no loose sleeves
 - Leather boots-no loose boot laces
- Take the time to inspect the chainsaw before operating the saw.
 - Check the chain and bar- Sharpness of chain, Bar seated correctly
 - Check the bolts and screws all around the saw- no missing screws or bolts
 - Check the casing of the saw- no cracked or missing plastic
- Make sure you're aware of your surroundings while operating the chainsaw.
 - Look for people working in your area- advise all personnel you're operating the saw.
 - Look for any snags or hazards in your area- look up for power lines, widow makers, etc.
 - Make sure you always have a spotter or swamper to use for communications.
 - Always watch your footing while operating the saw- loose, rocky, steep terrain can cause you to slip while the chainsaw is running.
- Always make sure you are comfortable doing the task at hand.
 - Proper training for personnel running saws.
 - While falling trees know your escape route.
 - If you are not comfortable falling the tree walk away. Notify your supervisor and mitigate the safety issues or turn down the assignment.

Have an idea? Have feedback? Share it.
