

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, November 4, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (9 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	1
Area Command Teams committed:	0
NIMOs committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6

** Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Area (PL 3)

New fires:	0
New large fires:	0
Uncontained large fires:	0
NIMO's committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6

Hurricane Sandy Support, Federal Emergency Management Agency. Eleven incident management teams and 28 crews are assigned.

Three NIMO's are assigned (Quesinberry, Kleinman and Hahnenberg).

- Quesinberry: Is assigned to provide support to Nassau County, NY.
- Kleinman: Is managing a staging area in New York City, NY.
- Hahnenberg: Is assigned to the State Emergency Operations Center in Albany, NY.

Two Type 1 Teams (Wilder and Opliger) are assigned.

- Wilder: Is managing road clearing operations and staging area in Charleston, WV.
- Opliger: Is managing a staging area at Fort Dix, NJ.

Six Type 2 Teams (Pisarek, Dueitt, Kollmeyer, Graham, West and Fry) are assigned.

- Pisarek: Is managing a mobilization center in Farmingdale, NY.
- Dueitt: Is being staged to Farmingdale, NY.
- Kollmeyer: Is managing road clearing operations in Greenwich, CT.
- Graham: Is being assigned to Charleston, WV.
- West: Is being assigned to Charleston, WV.
- Fry: Is being assigned to the Harrisburg Mobilization Center, Harrisburg, PA.

Northwest Area (PL 1)

New fires: 0
 New large fires: 0
 Uncontained large fires: 1

Juniper Creek, Vale District, BLM. Twenty-four miles northwest of Jordan Valley, OR. Brush and grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Scattered rain and snow showers will linger across the Northwest and the northern Rockies. Otherwise, the West will remain relatively dry and warm. Breezy and warm conditions will develop along the front range of the Rockies and spread across the Plains. A few snow showers drifting across the Dakotas. Cool but dry conditions will move into the Northeast and scattered showers and a few thunderstorms will form over the Southeast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

**Today's discussion is from the
Fireline Safety Category.**

BUILDING FIRELINE DOWNHILL WITH FIRE BELOW

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and down slope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.
