

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, November 7, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (19 new fires)
New large fires:	0 (*)
Large fires contained:	1
Uncontained large fires: **	1
Area Command Teams committed:	0
NIMOs committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Area (PL 3)

New fires:	6
New large fires:	0
Uncontained large fires:	0
NIMO's committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	6

Hurricane Sandy Support, Federal Emergency Management Agency. Nine incident management teams and 41 crews are assigned.

Three NIMO's are assigned (Quesinberry, Kleinman and Hahnenberg).

- Quesinberry: Is assigned to provide support to Nassau County, NY.
- Kleinman: Is supporting development and management of staging areas in the New York City area.
- Hahnenberg: Is assigned to the Office of Emergency Management in Brooklyn, NY.

Two Type 1 Teams (Wilder and Opliger) are assigned.

- Wilder: The team has completed its mission assignment in West Virginia and is staged in Harrisburg, PA.
- Opliger: Is managing a mobilization center at Fort Dix, NJ.

Four Type 2 Teams (Pisarek, Dueitt, Kollmeyer, Fry , Graham and West) are assigned.

- Pisarek: Is managing a mobilization, and receiving and distribution centers in New York City area.
- Dueitt: Is assisting FEMA field operations in the New York City area.
- Kollmeyer: Is establishing and managing points of distribution in Nassau County, NY.
- Fry: Is overseeing road clearing operations in New Jersey.
- Graham and West teams have been released.

Southwest Area (PL 1)

New fires: 0
 New large fires: 0
 Uncontained large fires: 1

Maggie, Tonto NF. Thirteen miles north of Carefree, AZ. Brush and grass. Creeping and smoldering.

Predictive Services Discussion: A Pacific storm system will move through the Northwest and northern Rockies, bringing rain and snow to the region. Ahead of the system warm conditions will continue for most of the Southwest and the Great Basin. Gusty wind and warm conditions will develop along the front range of the Rockies and the Plains while mild weather settles in from the Great Lakes to the Gulf coast. A developing East Coast storm will bring rain and snow to the mid-Atlantic and Northeast coasts.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

**Today's discussion is from the
Hazardous Materials Category.**

HAZARDOUS MATERIALS ENCOUNTERS

Employees who may encounter hazardous materials in the field should be trained as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

- Hazardous materials in the field include, but are not limited to:
 - Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
 - Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
 - Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.
- In all instances, self-protection is your primary responsibility.
- Respond to all encounters by implementing the Three Rs:
 - Recognize: Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
 - Retreat: Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position)
 - Report: Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
