

**National Interagency Coordination Center
Incident Management Situation Report
Monday, November 12, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (16 new fires)
New large fires:	0 (*)
Large fires contained:	0
Uncontained large fires: **	3
Area Command Teams committed:	0
NIMOs committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Area (PL 3)

New fires:	0
New large fires:	0
Uncontained large fires:	0
NIMO's committed:	3
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

Hurricane Sandy Support, Federal Emergency Management Agency. Nine incident management teams and 30 crews are assigned.

Three NIMO's are assigned (Quesinberry, Kleinman and Hahnenberg).

- Quesinberry: Is facilitating emergency road clearing in Nassau County, NY. Will be released tomorrow.
- Kleinman: Is coordinating with the New York City Office of Emergency Management Logistics Center.
- Hahnenberg: Will be released today.

Two Type 1 Teams (Wilder and Opliger) are assigned.

- Wilder: Is providing fire response planning assistance in Trenton, NJ.
- Opliger: Is managing a mobilization center at Fort Dix, NJ.

Four Type 2 Teams (Pisarek, Dueitt, Fry and Edwards) are assigned.

- Pisarek: Is managing a mobilization, and receiving and distribution centers in the New York City area.
- Dueitt: Is facilitating the FEMA Community Relations Project in the New York City area.
- Fry: Assisting with road clearing operations in New Jersey.
- Edwards: Assisting with road clearing operations in New Jersey.

Southern Area (PL 1)

New fires: 12
 New large fires: 0
 Uncontained large fires: 3

Pilot Mountain, North Carolina Division of Forest Resources. Twenty miles northwest of Winston-Salem, NC. Hardwood litter. No new information.

Penley, North Carolina Division of Forest Resources. Five miles east of Blowing Rock, NC. No new information.

Bixby, Oklahoma DOF. Two miles south of Leonard, OK. Hardwood litter. Last report unless new information is received.

Predictive Services Discussion: Scattered rain and snow will spread across the Northwest into the northern Rockies ahead of a Pacific frontal system. Breezy conditions will develop across the interior West with mild to warm weather continuing. Cold, Canadian air will plunge south through the Plains behind a cold front moving across the Mississippi Valley. Scattered rain and thunderstorms will form along the front from Louisiana to Kentucky changing to rain and snow through the Ohio Valley and the Great Lakes region. Breezy and mild conditions will continue in the eastern states.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Aviation Category.

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft. Involve the pilot in this discussion.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is. Avoid switching frequencies in the middle of an operational period.
- Consider using national air-to-ground frequencies.
- Discuss Guard frequencies:
 - How they work.
 - When to use them.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to. Do not use local slang.
- Know what you want to say before you key the microphone. Don't think and talk at same time.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling. Use a common frame of reference for the sender and receiver.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
