

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, November 14, 2012 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (54 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires: **	3
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

** Uncontained large fires include only fires being managed under a full suppression strategy.

Eastern Area (PL 1)

New fires:	1
New large fires:	0
Uncontained large fires:	0
NIMO's committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

Hurricane Sandy Support, Federal Emergency Management Agency. Six incident management teams and 1 crew are assigned.

One NIMO is assigned (Kleinman).

- Kleinman: Will be released today.

Two Type 1 Teams (Wilder and Opliger) are assigned.

- Wilder: Is assisting the state Fire Marshall with coastal assessments in New Jersey.

- Opliger: Is managing a mobilization center at Fort Dix, NJ. Will be released tomorrow.

Three Type 2 Teams (Pisarek, Fry and Edwards) are assigned.

- Pisarek: Is managing a mobilization and staging center in the New York City area. Will be released today.

- Fry: Is assisting with road clearing operations in New Jersey. Will be released tomorrow.

- Edwards: Is assisting with road clearing operations in New Jersey. Will be released today.

Southern California Area (PL 2)

New fires: 14
 New large fires: 1
 Uncontained large fires: 1

*** Creek**, San Luis Obispo Unit, Cal Fire. Twelve miles west of San Luis Obispo, CA. Brush and hardwood slash. Active fire behavior.

Predictive Services Discussion: Scattered snow showers will move through the high country of the northern Rockies. Otherwise, most of the West will cool and quiet. East of the Rockies, breezy conditions will begin warming up the Plains while high pressure keeps cool conditions over the Mississippi valley to the East coast. Scattered showers and thunderstorms will develop over the Southeast.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the Environmental Factors Category.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
