Predictive Services Discussion: Cooler and breezy conditions will spread over the Northwest and northern Rockies. Scattered thunderstorms will develop across the Southwest, eastern Great Basin and the central Rockies. Windy conditions will continue over the central Plains. Thunderstorms and heavy rain will continue across the Ohio Valley to the mid-Atlantic coast as remnants of Isaac persist over the region. Scattered showers and thunderstorms will develop along the Gulf coast.

Today's discussion is from the
Weather / Fire Behavior Category.

SPOT WEATHER FORECAST

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

● Basic elements needed for a spot weather forecast include:

- Name of fire and management agency
- Request time and date
- Location by ¼ section
- Drainage name
- Exposure
- Size
- Elevation (top and bottom)
- Fuel type
- Fire character (ground, crown, etc.)
- Weather conditions (place, elevation, observation time, wind direction, wind velocity, dry bulb, wet bulb, remarks and important U.S. indicators)

Activity: Calibrate your Kestrel and review belt weather kit use.
