

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 6, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (137 new fires)
New large fires:	8 (*)
Large fires contained:	3
Uncontained large fires: **	25
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	14

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS from the 146th Airlift Wing, Channel Islands (California Air National Guard), and the 145th Airlift Wing, Charlotte, NC are supporting wildland fire suppression operations out of Sacramento, CA. Two MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve) operating out of Boise, ID, will be released at end of shift today.

Northern Rockies Area (PL 4)

New fires:	2
New large fires:	0
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

McGuire Complex, Nez Perce NF. IMT 2 (Pearson). Five miles northwest of Dixie, ID. Timber. Backing fire with group tree torching. Numerous structures threatened. Evacuations in effect.

Millie, Gallatin NF. IMT 2 (Kidd). Twenty miles south of Bozeman, MT. Timber. Creeping and smoldering with torching. Structures threatened.

Pine Creek, Central Land Office, Montana DNR. IMT 1 (Poncin). Nine miles south of Livingston, MT. Timber. Backing fire. Numerous residences and communication towers threatened.

Powell SBW Complex (4 fires), Clearwater NF. IMT 2 (Hutton). Forty-five miles southwest of Lolo, MT. Timber. Flanking and backing fire with torching. Structures threatened.

Sawtooth, Bitterroot NF. IMT 2 (Heintz). Seven miles southwest of Hamilton, MT. Timber. Isolated torching with short-range spotting.

Black Tail Ridge, Northwestern Land Office, Montana DNR. IMT 2 (Kusicko). Three miles south of Plains, MT. Timber, logging slash and brush. Creeping and smoldering.

Nineteen Mile, Central Land Office, Montana DNR. IMT 2 (Benes). Ten miles southeast of Butte, MT. Timber, brush and grass. Creeping and smoldering with isolated torching.

Porcupine Complex (3 fires), Nez Perce NF. Previously reported incident. Twenty-five miles east of Elk City, ID. Timber. Minimal fire activity. Last report unless significant activity occurs.

Total	40	317,649	21	36	12	879

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Isolated to widely scattered thunderstorms will form over the Southwest, parts of the Great Basin and the Sierras of California. A cold front will drop through the northern Rockies and the northern Plains, possibly triggering a few thunderstorms across the region. Cooler conditions will spread over the Great Lakes and the upper and mid-Mississippi Valley. Warm and humid conditions will continue in the South, with scattered showers and thunderstorms forming over much of the East Coast. The southern Plains will remain very hot.

Nomex

Miscellaneous Category

Nomex is the brand name for a **heat and flame-resistant** textile made by the DuPont chemical company and first marketed in 1967. Today, more than three million firefighters and aviation personnel around the world are protected by structure fire turnout gear, wildland fire PPE, and flight suits and jackets made of Nomex.

Nomex IS NOT flame-proof. It burns when you hold a flame to it, but stops burning once the heat source is removed. The thick woven structure of synthetic fibers is a very poor conductor of heat. When exposed to heat, the fibers expand closing the spaces between them insulating the wearer. But to work correctly, Nomex needs care.

Dirty Nomex

- Wash Nomex like normal laundry, but always include a rinse cycle that adequately removes soaps and detergents.
- Nomex garments should never be subjected to strong oxidizing agents such as peroxides or bleaches. These harm the physical strength of the fabric.
- Tumble-dry and remove while slightly damp. Over-drying damages the fabric.

Poison Oak/Ivy/Sumac on Nomex - MTDC researched the laundering of Nomex firefighting clothing that has been contaminated with urushiol oil (what causes the rash) from poison oak/ivy/sumac exposure.

- MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomex laundering procedures, with a degreaser such as a detergent or laundry soap, and as soon as possible.
- Extra care should be exercised when handling the contaminated clothing and should be kept separate from unaffected clothing and equipment.
- Put the affected clothing in a marked bag if you are giving it to someone else to wash. Before handling the affected clothing, apply a skin-barrier product such as Ivy Block or Technu.

Fuel Soaked Nomex - Flammable contaminants will reduce the thermal performance of any flame-resistant garment including Nomex.

- Proper and periodic cleaning is essential to maintain thermal protective performance.

Action Item - Nomex is not effective if it is excessively dirty, fuel-soaked, or has holes. Does your Nomex need to be washed, repaired or replaced?
