

**National Interagency Coordination Center
Incident Management Situation Report
Friday, September 7, 2012 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (124 new fires)
New large fires:	4 (*)
Large fires contained:	3
Uncontained large fires: **	24
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	7
Type 2 IMTs committed:	11

** Uncontained large fires include only fires being managed under a full suppression strategy.

Two MAFFS from the 146th Airlift Wing, Channel Islands (California Air National Guard), and the 145th Airlift Wing, Charlotte, NC are supporting wildland fire suppression operations out of Sacramento, CA.

Northern Rockies Area (PL 4)

New fires:	8
New large fires:	2
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

McGuire Complex, Nez Perce NF. IMT 2 (Pearson). Two miles northwest of Dixie, ID. Timber. Active fire behavior with group tree torching. Numerous structures threatened. Evacuations in effect.

Millie, Gallatin NF. IMT 2 (Kidd). Twenty miles south of Bozeman, MT. Timber. Creeping and smoldering with isolated torching. Structures threatened.

Pine Creek, Central Land Office, Montana DNR. IMT 1 (Poncin). Nine miles south of Livingston, MT. Timber. Creeping and smoldering. Numerous residences and communication towers threatened.

Powell SBW Complex (4 fires), Clearwater NF. IMT 2 (Hutton). Forty-five miles southwest of Lolo, MT. Timber. Active fire behavior with group tree torching and short-range spotting. Structures threatened. Area and trail closures in effect.

Sawtooth, Bitterroot NF. IMT 2 (Heintz). Seven miles southwest of Hamilton, MT. Timber. Creeping and smoldering with isolated torching. Numerous structures threatened.

Black Tail Ridge, Northwestern Land Office, Montana DNR. Transfer of command from IMT 2 (Kusicko) back to the local unit will occur 9/9. Three miles south of Plains, MT. Timber, logging slash and brush. Smoldering.

Elbow Pass Complex, Lewis & Clark NF. Previously reported incident. Twenty-five miles southwest of Augusta, MT. Timber. Minimal fire activity. Last report unless significant activity occurs.

Ditch, Nez Perce NF. Previously reported incident. Thirty-three miles northeast of Elk City, ID. Timber. No further information received. Last report unless significant activity occurs.

Pettibone, Nez Perce NF. Previously reported incident. Thirty-eight miles northeast of Elk City, ID. Timber. No further information received. Last report unless significant activity occurs.

Vista, Nez Perce NF. Previously reported incident. Thirty-three miles northeast of Elk City, ID. Timber. No further information received. Last report unless significant activity occurs.

Square Rock, Nez Perce NF. Previously reported incident. Twenty-four miles northeast of Elk City, ID. Timber. No further information received. Last report unless significant activity occurs.

*** Grave**, Nez Perce NF. Twenty miles northeast of Elk City, ID. Timber. No further information received. Last report unless significant activity occurs.

3 Links, Nez Perce NF. Previously reported incident. Twenty-one miles east of Lowell, ID. Timber. No further information received. Last report unless significant activity occurs.

*** Watchtower Lake**, Bitterroot NF. Nineteen miles southwest of Conner, MT. Timber. No further information received. Last report unless significant activity occurs.

Predictive Services Discussion: Isolated to widely scattered thunderstorms will form over the Southwest and the southern Great Basin, mainly over higher terrain. Cooler conditions will spread over much of the northern Rockies and northern Great Basin. A cold front moving through the Plains will bring scattered showers and thunderstorms to the central Plains and the upper Midwest. Warm conditions will continue across the East with hot temperatures remaining over the southern Plains. Scattered afternoon thunderstorms will develop over the coastal areas from the Carolinas to the Mississippi.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Hazard Tree Category.

HAZARD TREE FELLING – TIPS #1

Felling a hazard tree requires accurate risk assessment and complexity analysis, and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure, i.e., collapse;
- Weakened sapwood resulting in loss of control when falling trees & limits solid wood for wedging;
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

Indicators of potential felling hazards:

- **Dead Limbs:** limbs of all sizes and species with decay evident cracking, or loose hung-up limbs. Avoid working under overhead hazards.
- **Witches Broom:** caused by mistletoe infection, limbs can grow very large and heavy (200+ lbs).
- **Split Trunk:** cracked trunk from frost, lightning or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail.
- **Stem Damage:** caused by windfall scarring, fire, machine, and animal damage, as well as heart rot diseases.
- **Thick Sloughing Bark or Sloughing Sapwood:** usually found on dead trees. Loose bark on Douglas fir or loose sapwood on wind snapped cedars can dislodge during falling.
- **Butt and Stem Cankers:** usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.
- **Fungal Fruiting Bodies or Conks:** found on stems may indicate massive interior rot 1 – 2 yards above and below conk. Excessive resinosis (resin flow) also indicates heart or root diseases.
- **Heavy Tree Lean:** may be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.
- **Root Condition:** look for any ground cracks around the base of the tree, signs of decay or fungal conks on the roots.
- **Cat Face:** look for enough solid wood to construct an effective undercut and back cut.
