Northwest Area (PL 4)

New fires:	6
New large fires:	0
Uncontained large fires:	18
Type 1 IMTs committed:	3
Type 2 IMTs committed:	5

Table Mountain, Okanogan/Wenatchee NF. IMT 1 (Morcom). Sixteen miles east of Cle Elum, WA. Timber, logging slash, brush and grass. Moderate fire activity with torching. Numerous structures threatened. Evacuations and road closures in effect.

Wenatchee Complex (10 fires), Okanogan/Wenatchee NF. IMT 1 (Pendleton and Reinarz). Two miles west of Wenatchee, WA. Timber, brush and grass. Short duration crown runs with spotting. Numerous residences threatened. Evacuations in effect.

Goat, Okanogan/Wenatchee NF. IMT 2 (Leitch). Three miles southwest of Pateros, WA. Timber and grass. Active fire behavior with torching and short-range spotting. Numerous structures threatened. Evacuations in effect.

Cascade Creek, Gifford Pinchot NF. IMT 2 (Nickey). Eight miles north of Trout Lake, WA. Timber. Active fire behavior.

Okanogan Complex (3 fires), Okanogan/Wenatchee NF. IMT 2 (Williams). Eight miles southeast of Carlton, WA. Timber. Backing fire with isolated torching. Structures threatened. Evacuations in effect.

Pole Creek, Deschutes NF. Transfer of command from IMT 2 (Watts) back to the local unit will occur 9/29. Six miles southwest of Sisters, OR. Timber. Creeping. Numerous residences threatened.

Yakima Complex, Okanogan/Wenatchee NF. IMT 2 (Johnson). Seventeen miles northwest of Ellensburg, WA. Timber, logging slash, brush and grass. Active fire behavior with occasional tree torching and short-range spotting.

New fires: 8
New large fires: 0
Uncontained large fires: 9
Type 1 IMTs committed: 2
Type 2 IMTs committed: 3

McGuire Complex (2 fires), Nez Perce NF. IMT 1 (Joseph). One mile northwest of Dixie, ID. Timber. Creeping and smoldering. Communities threatened. Evacuations in effect. Precipitation occurred over the fire area yesterday.

Eagle Creek, Northern Cheyenne Agency, BIA. IMT 2 (Heintz). Thirteen miles southwest of Lame Deer, MT. Grass. Running fire with spotting.

Sheep, Nez Perce NF. IMT 1 (Turman). One mile east of Lucille, ID. Timber, brush and grass. Moderate fire activity with occasional torching. Structures threatened.

Condon Mountain, Flathead NF. IMT 2 (Pearson). Three miles northeast of Condon, MT. Timber. Backing fire with isolated group tree torching. Residences threatened.

Wilson, Southern Land Office, Montana DNR. Eight miles southeast of Roundup, MT. Timber and grass. Creeping and smoldering. Communities threatened. Reduction in acreage due to more accurate mapping.

Sawtooth, Bitterroot NF. IMT 2 (Hall). Seven miles southwest of Hamilton, MT. Timber. Creeping and smoldering. Numerous structures threatened.

Millie, Gallatin NF. Twenty miles south of Bozeman, MT. Timber. Creeping and smoldering.

Cottonwood Creek, Dakota Prairie National Grasslands. Started on private land thirty miles southwest of Watford City, ND. Juniper, brush and grass. Creeping fire. Residences threatened.

This table does not include fires reported in the large fire section of this report. Updated weekly.

Predictive Services Discussion: Scattered showers and a few thunderstorms will develop across the Rockies from western Montana to Colorado. Otherwise, slowly warming conditions will spread over the West. A cold front will drop through the central U.S. bringing cooler weather to the northern Plains and upper Midwest. Scattered thunderstorms will develop ahead of the front from Oklahoma to New York. Warm and dry conditions will continue through the South with windy conditions continuing over northern Texas and western Oklahoma.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.html>

Today's discussion is from the
Entrapment Category.

VEHICLE ENTRAPMENT

If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:

- Park the vehicle in an area void of vegetation.
- Burn out around the vehicle if there is time.
- Park behind a natural barrier or structure. Consider that a structure could become involved which could severely impact nearby exposures/vehicles ([Harris Fire, SoCal, 2007](#)).
- Do not park on the downhill side of a road or under power lines or over-hanging vegetation.
- Stay out of saddles and draws.
- Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.
- Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.
- Roll up the windows and do not lock the doors since someone else might need to get in.
- Cover windows with fire shelters with reflective material placed against window.
- You must protect your airway; remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.
- Expect the following conditions if you are trapped inside the vehicle:
 - Temperatures may reach over 200 degrees Fahrenheit.
 - Smoke and sparks may enter the vehicle.
 - Plastic parts may start to melt and give off toxic gases.
 - Windows may start to crack.
 - Exposed skin may receive radiant heat burns.
- If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:
 - Each crewmember should cover themselves with a fire shelter.
 - Exit the vehicle from the side away from the greatest heat.
 - Stay together and get as low to the ground as possible, moving away from the vehicle.
 - Deploy your shelter in a safe area.
