Predictive Services Discussion: Widely scattered showers and thunderstorms will linger along the Canadian border from Washington to Montana. Widely scattered thunderstorms will develop over the southern and central Rockies and the central Plains, stretching east along a front through the Ohio Valley to the New Jersey coast. Temperatures around the West will begin a slow warm up. The northern Plains to New England will remain mild while hot, humid conditions continue across the South.

HELICOPTER LANDING AREA SAFETY

Aviation Category

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter. (Eye, hearing, head)
- Always get the approval of a flight crewmember or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember. Keep in pilot's field of vision at all times.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the down slope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
