

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday August 7, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (119 new fires)
New large fires:	2 (*)
Large fires contained:	0
Uncontained large fires: **	24
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	11

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On August 6, a water tender operator was fatally injured on the Big Windy Complex near Grants Pass, OR. The firefighting community extends condolences to the family and friends of the deceased.

One MAFFS C-130 aircraft from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard), and one from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

Northwest Area (PL 4)

New fires:	22
New large fires:	1
Uncontained large fires:	10
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Douglas Complex (three fires), Oregon DOF. IMT 2 (Sifford). Seven miles north of Glendale, OR. Timber and brush. Active fire behavior with torching and short-range spotting. Numerous structures and a communication site threatened. Evacuations and road closures in effect.

Whiskey Complex (two fires), Umpqua NF. IMT 2 (Williams). Six miles east of Tiller, OR. Timber, brush and grass. Active fire behavior with occasional torching and spotting. Structures threatened. Area closures in effect.

Big Windy Complex (three fires), Grants Pass Unit, Oregon DOF. IMT 1 (Schulte). Twenty-five miles northwest of Grants Pass, OR. Timber and brush. Surface fire with group torching. Structures threatened. Evacuations and area closures in effect.

Colockum Tarps, Southeast Region, Washington DNR. IMT 2 (Nickey). Six miles southeast of Malaga, WA. Timber and grass. Active fire behavior with group tree torching and short crown runs. Numerous residences threatened. Evacuations in effect.

Green Ridge, Deschutes NF. IMT 2 (Minton). Fourteen miles northwest of Sisters, OR. Timber and brush. Active fire behavior with torching and spotting. Residences threatened. Area closures in effect.

Labrador, Rogue River-Siskiyou NF. IMT 2 (Fillis). Thirteen miles northwest of Cave Junction, OR. Timber and brush. Creeping. Structures threatened.

* **Granite**, Okanogan-Wenatchee NF. Twenty-five miles west of Leavenworth, WA. Timber. Active fire behavior with short crown runs. Area closures in effect. Last report unless significant activity occurs.

Predictive Services Discussion: Isolated thunderstorms will form over northern California and southern Oregon in the afternoon. Scattered showers and thunderstorms will continue over the central and southern Rockies as well as the eastern U.S. Temperatures will dip slightly in the West. The northern and central Plains will cool even more as a cold front drops through the region. The Gulf states will remain hot and humid and New England and the Appalachians will be mild.

After Action Review part 1

Miscellaneous Category

How to conduct an effective AAR

An AAR is a professional discussion of an event with the objective to identify successes and failures. It is a tool that leaders, teams, crews and units can use to get maximum benefit from every incident or project. It is essential for wildland firefighters to learn from our mistakes and to capitalize on our successes. It is considered a valuable tool in high-risk professions where the smallest mistakes can lead to disastrous results. ***FYI – an AAR is not a critique and not a forum to assign blame. It's an open, honest and professional discussion for purposes of improvement.***

Once you (the leader/facilitator) have demonstrated that the AAR works and that it will be part of your team's Standard Operating Procedures, the discussion will become more open. Finding out *what* they did is not nearly as important as *why* they did it. Good active listening skills are essential. Do not immediately try to solve or correct the issue, but let it play out. Try to get to the root of the issue. The leader must be a part of the AAR and will have to accept criticism. This is important because the team will be looking for affirmation of the AAR process.

- Have the AAR as soon after an event as possible with all the personnel involved if at all possible.
- The leader's role is to insure there is skilled facilitation of the AAR.
- Make sure everyone participates.
- Pay attention to time.
- Establish clear ground rules: encourage candor and openness, all participants have equal ownership, focus on improving performance, and keep all discussions confidential.
- End on a positive note.

1. ***What was planned?***

Review the intent of the mission
Desired "End State" (what does "Right" look like).

2. ***What actually happened?***

Establish the facts
Pool multiple perspectives to build a shared picture of what happened.

3. ***Why did it happen?***

Analysis of cause and effect
Focus on WHAT not WHO.
Provide progressive refinement for drawing out explanations of what occurred.

4. ***What are we going to do next time?***

Correct Weaknesses
Focus on items you can fix, rather than external forces outside of your control.

References:

The Wildland Fire Leadership Development Program website has multiple additional references on conducting effective AARs, many designed specifically for wildland firefighters and leaders.
