

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday August 13, 2013 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Light (170 new fires)
New large fires:	3 (*)
Large fires contained:	1
Uncontained large fires: **	37
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	6
Type 2 IMTs committed:	17

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 aircraft from the 153<sup>rd</sup> Airlift Wing, Cheyenne (Wyoming Air National Guard) and one from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (Air Force Reserve) are supporting wildland fire suppression operations out of Boise, ID. Two MAFFS from the 146<sup>th</sup> Airlift Wing (California Air National Guard) are supporting wildland fire suppression operations out of Channel Islands Air National Guard Station, CA.

**Eastern Great Basin Area (PL 5)**

New fires:	29
New large fires:	0
Uncontained large fires:	10
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	4

**Elk**, Boise NF. IMT 1 (Harvey). Ten miles southwest of Pine, ID. Timber, brush and grass. Short crown runs and spotting. Numerous structures threatened. Evacuations and area closures in effect.

**Pony Complex**, Boise District, BLM. IMT 2 (Wilde). Twelve miles north of Mountain Home, ID. Timber, brush and grass. Running fire with group torching and spotting. Structures threatened. Evacuations and area closures in effect.

**Beaver Creek**, Twin Falls District, BLM. IMT 1 (Lund). Previously reported under Beaver Creek Complex. Twelve miles northeast of Fairfield, ID. Timber, brush and grass. Extreme fire behavior. Forest closures in effect.

**Millville**, Bear River Area, Utah DOF. Six miles southeast of Logan, UT. Grass. Active fire behavior. Numerous structures threatened.

**Lodgepole**, Salmon-Challis NF. Transfer of command from NIMO (Houseman) to IMT 2 (Whalen) will occur today. Ten miles west of Challis, ID. Timber and brush. Creeping with isolated torching. Structures threatened.

**McCan**, Twin Falls District, BLM. IMT 2 (Kidd). Previously reported under Beaver Creek Complex. Four miles northwest of Fairfield, ID. Timber, brush and grass. Creeping, smoldering and single tree torching. Structures threatened. Area closures in effect.

**Ridge**, Boise NF. Previously reported incident. Fourteen miles northeast of Lowman, ID. Timber. Creeping and smoldering with isolated torching.

**State**, Bear River Area, Utah DOF. IMT 2 (Day). Eight miles west of Portage, UT. Brush and grass. Running and torching. Structures threatened.

**Patch Springs**, Salt Lake Field Office, BLM. Two miles northwest of Terra, UT. Timber. Extreme rates of spread with group torching. Structures threatened.

**Packer Creek**, Bridger-Teton NF. Twenty-eight miles north of Pinedale, WY. Timber. No new information. Last report unless new information is received.

#### Northwest Area (PL 4)

New fires:	41
New large fires:	2
Uncontained large fires:	14
Type 1 IMTs committed:	1
Type 2 IMTs committed:	7

**Douglas Complex** (three fires), Oregon DOF. IMT 2 (Sifford). Seven miles north of Glendale, OR. Timber and brush. Creeping with areas of active surface fire. Numerous structures and a communications site threatened.

**Big Windy Complex**, Grants Pass Unit, Oregon DOF. IMT 1 (Lewis). Twenty-five miles northwest of Grants Pass, OR. Timber and brush. Creeping and smoldering. Structures threatened. Evacuations and area closures in effect.

**Whiskey Complex** (two fires), Umpqua NF. IMT 2 (Johnson). Six miles east of Tiller, OR. Timber, brush and grass. Creeping and smoldering. Area closures in effect.

**Milepost 10**, Southeast Region, Washington DNR. IMT 2 (Johnson). One mile south of Malaga, WA. Timber, brush and grass. Creeping and smoldering. Numerous structures threatened. Reduction in acreage due to more accurate mapping.

**GC Complex**, Malheur NF. IMT 2 (Watts). One mile north of John Day, OR. Brush and grass. Creeping and smoldering.

**Westside Complex**, Colville Agency, BIA. IMT 2 (Leitch). Thirteen miles west of Nespelem, WA. Timber, brush and grass. Isolated torching and short-range spotting.

**Cedar Mountain**, Vale District, BLM. Twenty-six miles north of Rome, OR. Brush and grass. Short runs and smoldering.

**Green Ridge**, Deschutes NF. Transfer of command from IMT 2 (Minton) back to the local unit occurred yesterday. Fourteen miles northwest of Sisters, OR. Timber and brush. Creeping and smoldering.

**Colockum Tarps**, Southeast Region, Washington DNR. Six miles southeast of Malaga, WA. Timber and grass. Creeping and smoldering. Numerous residences threatened.

\* **Conrad Lake**, Okanogan-Wenatchee NF. IMT 2 (Allbee). Thirty-five miles southwest of Naches, WA. Timber. Active fire behavior. Road closures in effect.

\* **Lava**, Burns District, BLM. Nine miles northwest of Diamond, OR. Grass. Active fire behavior.

**Predictive Services Discussion:** Isolated thunderstorms will form over the northern Rockies and the far northern Great Basin. Scattered showers and thunderstorms will form over the central and southern Rockies, the higher terrain of Utah, and across the southern Plains, Gulf Coast and the Eastern states. Much of the West will be hot and dry. The northern Plains to New England will be mild, and the South will be very warm and humid. Alaska will continue unseasonable warm and dry in the central and eastern Interior, while widely scattered showers form over the north and the southwest.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

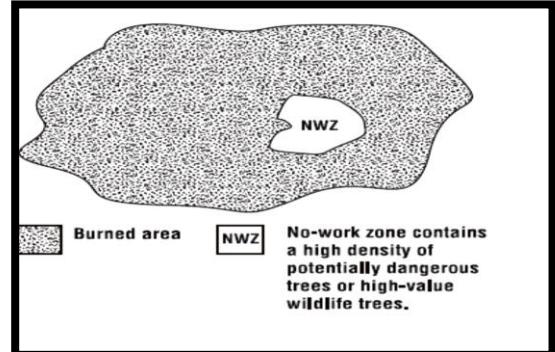

## HAZARD TREE – NO WORK ZONES (NWZ)

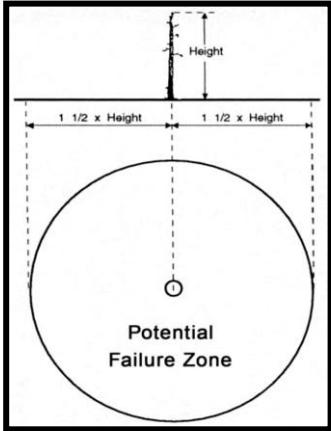

### Hazard Tree Category

Knowing when the exact time a given hazard tree (or compromised section) will fail is an extremely difficult, and is, in many cases, an unpredictable task. Given this fact, we need to manage firefighters' exposure to these hazards by creating a safe work area or NWZ. The size and extent of the NWZ must be determined by onsite conditions, such as terrain, lean, active fire in the tree and adjoining trees.

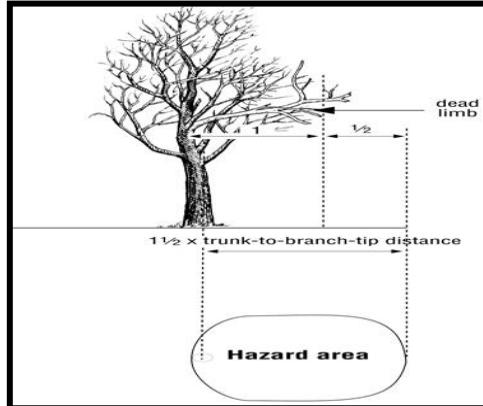

When an identified hazardous tree cannot be felled, then perform an assessment of which areas have too high a risk, and post a lookout to warn the personnel to stay clear of these areas while working in adjacent areas. If hazard still exists before leaving the area, flag the NWZ so that personnel entering the area will be able to recognize the hazard. Use the following failure zone illustrations as examples to help manage firefighter exposure to these identified hazards. Also remember to include the possibility of the "Domino Effect" to surrounding trees.

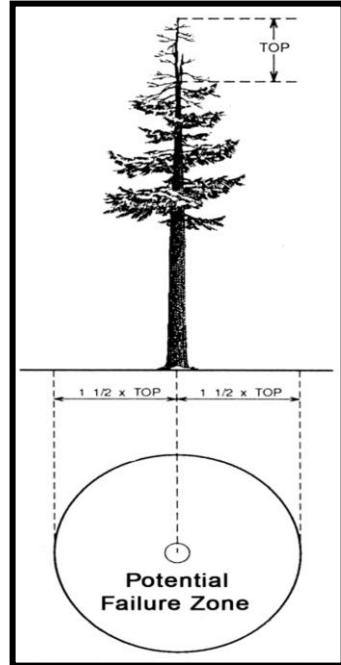

**#1 –  $1\frac{1}{2} \times$  Height of snag**

**#2 –  $1\frac{1}{2} \times$  trunk-to-branch-tip distance**

**#3 -  $1\frac{1}{2} \times$  length of dead top.**
