

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, August 28, 2013 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

|                               |                       |
|-------------------------------|-----------------------|
| Initial attack activity:      | Light (119 new fires) |
| New large fires:              | 0 (*)                 |
| Large fires contained:        | 1                     |
| Uncontained large fires: **   | 33                    |
| Area Command Teams committed: | 0                     |
| NIMOs committed:              | 2                     |
| Type 1 IMTs committed:        | 7                     |
| Type 2 IMTs committed:        | 12                    |

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On August 25, a contract firefighter died on the Nabob fire on the Rogue River-Siskiyou National Forest in California. The firefighting community extends condolences to the family and friends of the deceased.

Two MAFFS C-130 aircraft from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (Air Force Reserve) and one from the 145<sup>th</sup> Airlift Wing (North Carolina Air National Guard) are supporting wildland fire suppression operations out of McClellan Air Park, CA. Two MAFFS from the 146<sup>th</sup> Airlift Wing (California Air National Guard) are supporting wildland fire suppression operations out of Channel Islands Air National Guard Station, CA.

**Predictive Services Discussion:** Scattered thunderstorms will develop from the northern Rockies to Arizona and southern California. Thunderstorms will also form over the central and southern Rockies. A few light rain showers will move into western and central Washington. Temperatures will remain warm over much of the West. Thunderstorms will move through the northern Plains and across the Ohio Valley to the mid-Atlantic Coast. Very hot temperatures will continue over most of the eastern two-thirds of the nation.

## DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

### Fireline Safety Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
  - Crew supervisor(s) is in direct contact with lookout who can see the fire.
  - Communication is established between all crews.
  - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
