

National Interagency Coordination Center
Incident Management Situation Report
Friday, July 5, 2013 – 0530 MT
National Preparedness Level 3

National Fire Activity

Initial attack activity:	Moderate (203 new fires)
New large fires:	4 (*)
Large fires contained:	5
Uncontained large fires: **	25
Area Command Teams committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	7

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve), and the 146th Airlift Wing, Channel Islands (California Air National Guard) are supporting wildland fire suppression operations out of Phoenix, AZ.

Southwest Area (PL 4)

New fires:	23
New large fires:	0
Uncontained large fires:	6
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Yarnell Hill, Phoenix District, Arizona State Forestry Division. IMT 1 (Reinarz). Four miles west of Yarnell, AZ. Brush and grass. Creeping and smoldering with single tree torching. Numerous structures threatened. Evacuations in effect.

Dean Peak, Colorado River District, BLM. IMT 2 (Reidy). Ten miles southeast of Kingman, AZ. Pinyon pine, juniper and brush. Backing fire with torching. Numerous structures and communication sites threatened. Evacuations and road closures in effect.

Silver, Gila NF. Transfer of command from IMT 2 (Pierson) back to the local unit will occur today. One mile west of Kingston, NM. Timber. Creeping and smoldering. Precipitation occurred over the fire area yesterday.

Jaroso, Santa Fe NF. Eight miles south of Truchas, NM. Timber. Creeping and smoldering. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Beaver, Truxton Canyon Agency, BIA. Fifty-eight miles northwest of Peach Springs, AZ. Brush and grass. Moderate fire behavior.

Doce, Prescott NF. Seven miles northwest of Prescott, AZ. Timber and brush. Smoldering.

Stuart Creek #2, Military Zone, Alaska Fire Service. IMT 1 (McGowan) and IMT 2 (Allbee). Twenty-five miles east of North Pole, AK. Black spruce. Running fire with torching and spotting. Communities of Two Rivers and Eielson AFB are threatened.

Moon Lake, Tok Area Forestry, Alaska DOF. IMT 2 (Allen). IMT is also managing the Tetlin Jct. Ridge incident. Twenty miles west of Tok, AK. Timber. No new information.

Tetlin Jct. Ridge, Tok Area Forestry, Alaska DOF. Eighteen miles east of Tok, AK. Timber. No new information.

Skinny's Road, Fairbanks Area Forestry, Alaska DOF. IMT 2 (Savage). Thirty miles west of Fairbanks, AK. Black spruce. Creeping and smoldering with occasional torching. Structures threatened.

Beaver Log Lakes, Tanana Zone, Alaska Fire Service. One mile northeast of Minchumina Lake, AK. Black spruce and tundra. No new information.

* **Nation River**, Upper Yukon Zone, Alaska Fire Service. Thirty-five miles north of Eagle, AK. Black spruce. Active fire behavior with isolated torching. Last report unless significant activity occurs.

Ray River 2, Tanana Zone, Alaska Fire Service. Previously reported incident. Forty-three miles southeast of Bettles, AK. Black spruce and tundra. Running fire with isolated torching. Last report unless significant activity occurs.

Big Salt, Tanana Zone, Alaska Fire Service. Previously reported incident. Fifty-two miles northeast of Tanana, AK. Timber. Smoldering. Last report unless significant activity occurs.

Kanuti River 1, Tanana Zone, Alaska Fire Service. Previously reported incident. Forty-three miles southeast of Beetles, AK. Brush and tundra. Smoldering. Last report unless significant activity occurs.

* **Joint Lake**, Upper Yukon Zone, Alaska Fire Service. Started on FWS land thirty-seven miles north of Fort Yukon, AK. Black spruce and tundra. Running fire with isolated torching. Last report unless significant activity occurs.

* **Bull Creek #2**, Upper Yukon Zone, Alaska Fire Service. Seventy miles north of Eagle, AK. Black spruce. Smoldering. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will form over the Rockies from Montana to New Mexico with isolated storms developing over the eastern Great Basin. Most storms over the mountains will produce some wetting rain. Near normal temperatures will return to the Northwest and northern Rockies while the Southwest continues to see very high temperatures. Scattered storms with heavy rain will continue over the eastern U.S. while warm and humid conditions remain over the Plains. In Alaska, scattered showers and a few thunderstorms will continue over the south, west and north while the Interior continues warm and dry with isolated thunderstorms.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

"This Day in History" is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

Part III - South Canyon Fire, Colorado, 1994 (A Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colo., lightning ignites a fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Initial attack resources are assigned. Four days later, on July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several rapid runs. Fourteen firefighters perish as they try to outrun the flames.

July 5 – Summary of Activities

Red flag warnings and *very high* to *extreme* fire danger are predicted again today.

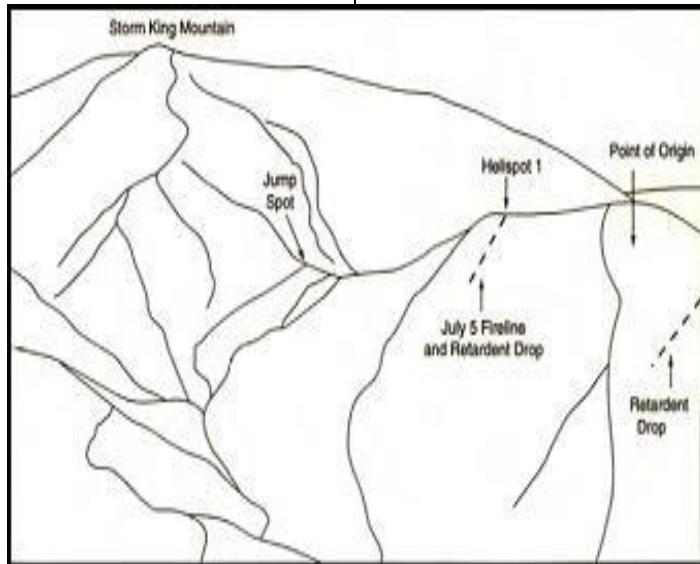

A crew of seven firefighters hikes up into the South Canyon Fire at the base of Storm King Mountain. They cut Helispot 1 and begin direct fireline construction downhill along the fire's edge below this helispot.

The IC orders another district engine crew, one helicopter, and one 20-person hand crew. A load of eight smokejumpers is then substituted for the hand crew.

To support fireline construction, an air tanker retardant drop is requested. After the first load is dropped, due to steep terrain and gusty winds, the IC and pilot agree that more drops would be ineffective.

At 5:30 p.m. the IC and engine crew leave the fire to refurbish equipment. Fifteen minutes later, 8 smokejumpers are dropped at the top of the fire. The IC directs them to work on the fireline from the helispot downhill toward the west drainage.

The Jumper-in-Charge informs the IC that the fire has crossed their fireline and is burning actively. The jumpers begin building fireline on the east side of the ridge. After sizing-up the current fire, the Jumper-in-Charge orders two Type 1 hand crews. By 10 p.m., the fire has grown 20 acres today. It now covers 50 acres.

Lessons Learned Discussion Points

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, and rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative.

If your fire crew was assigned to construct fireline downhill on Storm King, what would your concerns be? Could you perform this operation safely? (Reference page 1, 6 and 8 in your IRPG for this discussion.)
