

**National Interagency Coordination Center
Incident Management Situation Report
Saturday July 6, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Heavy (352 new fires)
New large fires:	14 (*)
Large fires contained:	13
Uncontained large fires: **	16
Area Command Teams committed:	1
NIMOs committed:	0
Type 1 IMTs committed:	6
Type 2 IMTs committed:	6

** Uncontained large fires include only fires being managed under a full suppression strategy.

Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Carpenter 1, Humboldt-Toiyabe NF. IMT 1 (Harvey) and IMT 2 (Adell). One mile from Kyle Canyon, NV. Pinyon pine and juniper. Extreme fire behavior with crowning and spotting. Communities of Kyle, Lee and Trout Canyon, youth camps and a ski area are threatened.

Bison, Western Nevada Agency, BIA. IMT 2 (Whalen). Five miles east of Gardnerville, NV. Pinyon pine, juniper, brush, and grass. Active fire behavior with running and spotting. Structures threatened. Evacuations in effect.

* **Gregerson**, Ely District, BLM. Twenty-five miles southeast of Alamo, NV. Grass. Active fire behavior.

Goat Peak, Battle Mountain District, BLM. Twenty miles south of Battle Mountain, NV. Pinyon pine, juniper and brush. Smoldering.

Eightmile, Ely District, BLM. Ten miles east of Alamo, NV. Timber and brush. Backing and creeping with short runs. Last report unless significant activity occurs.

* **Black**, Ely District, BLM. Fifteen miles south of Baker, NV. Pinyon pine, juniper, and brush. Short crown runs. Last report unless significant activity occurs.

Stuart Creek #2, Military Zone, Alaska Fire Service. IMT 1 (McGowan) and IMT 2 (Allbee). Twenty-five miles east of North Pole, AK. Black spruce. Moderate fire behavior. Numerous structures threatened.

Moon Lake, Tok Area Forestry, Alaska DOF. IMT 2 (Allen). IMT is also managing the Tetlin Jct. Ridge incident. Twenty miles west of Tok, AK. Timber. Active fire behavior with torching. Structures threatened.

Tetlin Jct. Ridge, Tok Area Forestry, Alaska DOF. Eighteen miles east of Tok, AK. Timber. Moderate fire behavior with torching. Reduction in acreage due to more accurate mapping.

Beaver Log Lakes, Tanana Zone, Alaska Fire Service. One mile northeast of Minchumina Lake, AK. Black spruce and tundra. Creeping and smoldering with single tree torching. Numerous structures threatened.

Prospect Creek, Tanana Zone, Alaska Fire Service. Previously reported incident. Twenty miles east of Bettles, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

Sulatna River, Tanana Zone, Alaska Fire Service. Previously reported incident. Started on FWS land forty-three miles southeast of Ruby, AK. Black spruce. No further information received. Last report unless significant activity occurs.

Little Mud, Tanana Zone, Alaska Fire Service. Previously reported incident. Started on FWS land forty miles east of Ruby, AK. Brush. No further information received. Last report unless significant activity occurs.

North Porcupine, Upper Yukon Zone, Alaska Fire Service. Previously reported incident. Started on FWS land eighty-five miles northeast of Fort Yukon, AK. Timber. No further information received. Last report unless significant activity occurs.

Siruk Creek, Tanana Zone, Alaska Fire Service. Previously reported incident. Twenty-five miles northwest of Allakaket, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Toklat River East**, Tanana Zone, Alaska Fire Service. Thirty-six miles west of Garner AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

Bear Creek, Galena Zone, Alaska Fire Service. Previously reported incident. Thirty-nine miles southeast of Unalakleet, AK. Black spruce. Creeping and smoldering. Last report unless significant activity occurs.

* **Chandalar**, Upper Yukon Zone, Alaska Fire Service. Started on FWS land eight miles west of Venetie, AK. Timber. No further information received. Last report unless significant activity occurs.

* **Sandless Lake**, Tanana Zone, Alaska Fire Service. Fifty-one miles west of Garner, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Titna**, Tanana Zone, Alaska Fire Service. Seventy-nine miles east of Ruby, AK. Black spruce. No further information received. Last report unless significant activity occurs.

* **McKinley River East**, Tanana Zone, Alaska Fire Service. Started on NPS land thirty-six miles southeast of Minchumina Lake, AK. Timber. No further information received. Last report unless significant activity occurs.

Timber Creek, Tanana Zone, Alaska Fire Service. Previously reported incident. Eighteen miles northwest of Bettles, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Birch Creek**, Upper Yukon Zone, Alaska Fire Service. Ten miles northwest of Circle Hot Springs, AK. Black spruce and tundra. Active fire behavior with group torching.

* **Wigand Creek**, Tanana Zone, Alaska Fire Service. Thirty-six miles west of Garner, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

* **Bear Creek**, Tanana Zone, Alaska Fire Service. Started on NPS land thirty-seven miles southeast of Minchumina Lake, AK. Black spruce and tundra. No further information received. Last report unless significant activity occurs.

Predictive Services Discussion: Scattered thunderstorms will develop over the southern and central Rockies with isolated dry storms forming from southern Idaho to Arizona. A trough over the Northwest will bring drier air into the much of the West. Temperatures will continue to be near to slightly above normal. In the East, widespread thunderstorm activity will continue east of the Mississippi. The Plains will remain hot and humid. In Alaska, showers and a few thunderstorms will continue over the south and west but warm and dry conditions will hold in the central and eastern Interior.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

“This Day in History” is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

Part IV - South Canyon Fire, Colorado, 1994 (Last of a Four-Part Series)

Incident Summary: On July 2, 1994, seven miles west of Glenwood Springs, Colo., lightning ignites a fire in piñon-pine and juniper on a ridge at the base of Storm King Mountain. The entire general area, in a one-year drought, is experiencing low humidities and record-high temperatures. Over the next two days, the South Canyon Fire increases in size. Initial attack resources are assigned. Four days later, on July 6, a dry cold front moves into the fire area. As winds and fire activity increases, the fire makes several rapid runs. Fourteen firefighters perish as they try to outrun the flames.

July 6 – Summary of Activities

A total of 36 fires are now burning on this BLM District. During the night, due to the hazards of rolling rocks, the smokejumpers abandon their line construction on the South Canyon Fire up on Storm King Mountain. The fire continues to flare-up throughout the night. A cold front pushing 30-35 mph winds is predicted to occur by 3 p.m. today. A red flag warning has been issued for these frontal winds.

4:30 a.m.: The 11 firefighters from yesterday return and begin their almost 4-hour hike up the east drainage to the fire—where they clear Helispot 2.

8:45 a.m.: The day's tactical plan calls for improving the fireline on the ridge between helispots 1 and 2. The jumpers and a newly ordered hotshot crew will construct hand line along the fire's edge on its western flank.

9:30 a.m.: The IC and Jumper-in-Charge take a helicopter recon flight. The Jumper-in-Charge and a jumper on ground discuss lack of safety areas on the fire. It is decided to continue with the original suppression plan. At 10:30 a.m., 8 more smoke jumpers land at the fire. They are assigned to reinforce line building on the west flank. By 11 a.m., the hotshot crew arrives at the helibase to be shuttled up to the fire.

12 p.m.: Winds increase—with gusts up to 30 mph. 12:30 p.m.: The hotshot crew Superintendent and 9 of his crew arrive at Helispot 2. The IC, Jumper-in-Charge, and hotshot Superintendent agree to send these 9 hotshots down the west flank to reinforce the jumpers.

1 p.m.: A flare-up on the west flank forces some of the jumpers to retreat up the fireline toward the top of the ridge. They discuss safety concerns about building this fireline. After a helicopter water drop, they move back down the hill and continue building fireline.

3 p.m.: The remaining 10 hotshots arrive at Helispot 2 to widen hand line and put out spot fires along the ridge. 20 minutes later, the predicted cold front moves into the area. Strong winds immediately increase the fire activity. Within 45 minutes, water drops are no longer effective. The fire makes rapid runs with 100-foot flame lengths. In response, firefighters start walking back up the fireline.

4 p.m.: The fire blows up. It crosses the drainage and runs up the ridge. A spot fire is observed on the east side of the drainage below a retreating crew. 40 mph winds push the blow-up to the ridge in 2 minutes.

Fourteen firefighters who try to outrun the flames perish: *Kathi Beck, Tami Bickett, Scott Blecha, Levi Brinkley, Robert Browning, Doug Dunbar, Terri Hagen, Bonnie Holtby, Rob Johnson, Jon Kelso, Don Mackey, Roger Roth, James Thrash, and Richard Tyler.*

Lessons Learned Discussion Points

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations.

- Discuss how the basics of LCES can help prevent getting into an entrapment situation. (Reference page 6 in your IRPG for this discussion.)
- One recommendation from the South Canyon fire review was that every firefighter should carry a radio. Discuss how radios can be used to increase situational awareness.
- Explain why experience alone isn't enough to protect you in an entrapment situation such as the one that took firefighters' lives on the South Canyon Fire.
- What are some tell-tale signs that your work environment is becoming increasingly hazardous?
