Predictive Services Discussion: Scattered thunderstorms will continue over the Rockies and the eastern Great Basin. Scattered showers and thunderstorms will spread across the southern Plains and along the Gulf Coast to the mid-Atlantic. Temperatures in the West will continue to rise while remaining warm in the East. The plains of Colorado, New Mexico and West Texas will see a significant cool down. In Alaska, temperatures will start to fall across most of the state as clouds increase and showers enter the western coast.

HAZARD TREE - RISK MANAGEMENT

Hazard Tree Category

Situational Awareness/ Hazard Assessment

● Environment:

- Existing winds and forecast
- Night operations
- Steep slopes
- Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

● Hazard Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up

Note: *In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.*

● Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating "No Work Zones" (NWZ) – (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds
