

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday July 23, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

| | |
|-------------------------------|----------------------|
| Initial attack activity: | Light (98 new fires) |
| New large fires: | 6 (*) |
| Large fires contained: | 6 |
| Uncontained large fires: ** | 23 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 11 |

** Uncontained large fires include only fires being managed under a full suppression strategy.

One MAFFS C-130 aircraft from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard), and one from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

Eastern Great Basin Area (PL 4)

| | |
|--------------------------|----|
| New fires: | 16 |
| New large fires: | 1 |
| Uncontained large fires: | 8 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 5 |

*** 210 Road**, Sawtooth NF. IMT 1 (Blume). Four miles south of Stanley, ID. Timber and brush. Running fire. Residences threatened. Evacuations and road closures in effect.

Lodgepole, Salmon-Challis NF. IMT 2 (Adell). Ten miles west of Challis, ID. Timber. Active fire behavior with crowning and spotting. Structures threatened.

Ridge, Boise NF. IMT 2 (Wilde). Fourteen miles northeast of Lowman, ID. Timber. Active fire behavior with short crown runs and spotting.

Thunder City, Payette NF. IMT 2 (Johnson). Four miles northeast of Stibnite, ID. Timber. Crown runs with spotting.

Pine Creek, Idaho Department of Lands. Transfer of command from IMT 2 (Kidd) back to the local unit will occur tomorrow. Started on Forest Service land seven miles southwest of Idaho City, ID. Timber, brush and grass. Interior burning with single tree torching.

Summit, Idaho Department of Lands. Transfer of command from IMT 2 (Dunford) back to the local unit occurred yesterday. Started on Forest Service land eight miles southwest of Lowman, ID. Timber. Isolated interior single tree torching with occasional short-range spotting.

Rocky, Salt Lake District, BLM. Twenty-two miles southeast of Grouse Creek, UT. Timber, juniper and grass. Isolated torching. Reduction in acreage due to more accurate mapping.

Brown Butte, Twin Falls District, BLM. Six miles northeast of Shoshone, ID. Brush. Smoldering. Reduction in acreage due to more accurate mapping.

Predictive Services Discussion: Scattered thunderstorms will develop across the Four Corners region with thunderstorms through California and parts of Nevada. Most storms will produce some rainfall but amounts will be lighter farther west. Hot and dry conditions will continue in the Northwest. Scattered thunderstorms will cover much of the eastern U.S. and Mississippi Valley. Conditions will remain hot across the Plains with mild to warm conditions in the East.

SAFETY ZONES (part 1)

*LCES (Lookouts, Communication, Escape Routes, and Safety Zones)
Category*

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
- How do you identify a good safety zone?
 - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
 - The best locations are usually “in the black;” those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
 - Location is scouted and marked well for visibility at all times.
 - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
 - For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height. This distance must be maintained on all sides, if the fire has ability to burn completely around the safety zone. Convective heat from wind and/or terrain influences will increase this distance requirement.
 - Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.
- What should you avoid in selecting a safety zone?
 - Avoid locations that are downwind from the fire.
 - Avoid locations that are in chimneys, saddles, or narrow canyons.
 - Avoid locations that require a steep uphill escape route.
