

**National Interagency Coordination Center
Incident Management Situation Report
Friday July 26, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (109 new fires)
New large fires:	5 (*)
Large fires contained:	2
Uncontained large fires: **	21
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	10

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 aircraft from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard), and one from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

Northern Rockies Area (PL 3)

New fires:	12
New large fires:	3
Uncontained large fires:	6
Type 2 IMTs committed:	2

* **Mill Creek**, Southwestern Land Office, Montana DNRC. Two miles east of Frenchtown, MT. Timber and grass. Extreme fire behavior. Structures threatened. Evacuations in effect.

* **Moose Meadows**, Beaverhead/Deerlodge NF. IMT 2 (Pearson). Twenty miles southwest of Philipsburg, MT. Timber. Active fire behavior with crowning and long-range spotting. Numerous structures threatened. Evacuations in effect.

West Mullan, Lolo NF. IMT 2 (Heintz). Four miles west of Superior, MT. Timber. Interior creeping and smoldering with isolated single tree torching. Area closures in effect.

Emigrant, Gallatin NF. Nine miles south of Emigrant, MT. Timber and grass. Moderate fire behavior with short crown runs. Residences threatened. Road and area closures in effect.

Gold Creek, Lolo NF. Sixteen miles northeast of Missoula, MT. Timber. Creeping and smoldering.

Crescendo, Idaho Panhandle NF. Twenty-two miles south of Avery, ID. Timber and brush. Creeping with isolated torching.

Gold Pan, Bitterroot NF. Previously reported incident. Thirty-five miles southwest of Conner, MT. Timber. No further information received. Last report unless significant activity occurs.

Red Shale, Lewis & Clark NF. Previously reported incident. Thirty-seven miles west of Choteau, MT. Timber. No further information received. Last report unless significant activity occurs.

* **Bailey**, Nez Perce NF. Thirty-four miles east of Lowell, ID. Timber. No further information received. Last report unless significant activity occurs.

Eastern Great Basin Area (PL 4)

New fires: 19

New large fires: 0

Uncontained large fires: 4

Type 2 IMTs committed: 3

Lodgepole, Salmon-Challis NF. IMT 2 (Adell). Ten miles west of Challis, ID. Timber. Active fire behavior with crowning and spotting. Structures threatened. Evacuations and area closures in effect.

Ridge, Boise NF. IMT 2 (Wilde). Fourteen miles northeast of Lowman, ID. Timber. Active fire behavior with torching and short-range spotting. Road closures in effect.

Thunder City, Payette NF. IMT 2 (Johnson). Four miles northeast of Stibnite, ID. Timber. Creeping and smoldering with torching and short-range spotting.

Goslin, Ashley NF. Four miles northeast of Dutch John, UT. Timber and grass. Minimal fire behavior.

Papoose, Salmon-Challis NF. Previously reported incident. Forty miles west of Salmon, ID. Timber, brush and grass. Backing fire with short runs. Last report unless significant activity occurs.

Summit, Idaho Department of Lands. Started on Forest Service land eight miles southwest of Lowman, ID. Timber. No new information. Last report unless new information is received.

Predictive Services Discussion: Scattered showers and thunderstorms will develop across the Southwest, the central Rockies, and the southern Great Basin. Isolated thunderstorms will develop across far northern California and move through southeastern Oregon, central Idaho, and southwestern Montana. Scattered rain and a few thunderstorms will form along a front from the Great Lakes to Oklahoma and northern Texas. Cooler conditions will spread across the northern Plains, the Midwest, and the mid-Mississippi Valley. Rain will continue over New England with much cooler weather while the Southeast remains warm and humid.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Subjective vs. Objective Hazards

*LCES (Lookouts, Communication, Escape Routes, Safety Zones)
Category*

A popular mountaineering test divides the alpinists' hazards into two distinct types: subjective, which one has direct control over (e.g., condition of the equipment, the decision to turn back) and objective hazards which are inherent to the alpine environment (e.g., avalanches, rock fall).

Objective hazards are a natural part of the environment. They cannot be eliminated and either one must not go into the environment where they exist or adhere to a procedure where safety from the hazard is assured.

Similarly, the wildland firefighter's hazards are either subjective or objective. Examples of subjective hazards would be working below a dozer constructing fireline or the use of improper techniques while felling a tree. The fireline supervisor has direct control over these types of hazards.

The wildland fire environment has four basic objectives hazards; lightning, fire-weakened timber (standing and lying), rolling rocks and entrapment by running fires. When these hazards exist the options are to not enter the environment or to adhere to a safe procedure. I feel the key to this safe procedure is LCES.

Although, the following discussion applies to all objective hazards, we will directly address fire entrapments.

- Identify subjective or objective hazards of working in the vicinity of:
 - Dozer(s) or Tractor Plows
 - Snags
 - Helicopters
 - Fixed Wing Aircraft
 - Other Engines and Vehicles
 - ATVs
 - Oil and Gas Wells and Pipelines
 - Power lines
