

**National Interagency Coordination Center
Incident Management Situation Report
Sunday July 28, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

| | |
|-------------------------------|--------------------------|
| Initial attack activity: | Moderate (202 new fires) |
| New large fires: | 5 (*) |
| Large fires contained: | 1 |
| Uncontained large fires: ** | 27 |
| Area Command Teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 14 |

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 aircraft from the 145th Airlift Wing, Charlotte (North Carolina Air National Guard), and one from the 153rd Airlift Wing, Cheyenne (Wyoming Air National Guard), are supporting wildland fire suppression operations out of Boise, ID.

Northwest Area (PL 3)

| | |
|--------------------------|----|
| New fires: | 70 |
| New large fires: | 3 |
| Uncontained large fires: | 7 |
| Type 2 IMTs committed: | 5 |

Mile Marker 28, Yakama Agency, BIA. IMT 2 (Rabe). Fifteen miles northeast of Goldendale, WA. Timber, brush and grass. Active fire behavior with short crown runs and long-range spotting. Numerous structures and power lines threatened. Evacuations and road closures in effect.

* **Douglas Complex**, Oregon DOF. IMT 2 (Sifford). Seven miles north of Glendale, OR. Timber and brush. Extreme fire behavior with short crown runs and long-range spotting. Numerous structures and communication site threatened. Evacuations in effect.

* **Whiskey Complex** (three fires), Umpqua NF. IMT 2 (Williams). Six miles east of Tiller, OR. Timber, brush and grass. Active fire behavior with torching and long-range spotting. Structures threatened. Road and area closures in effect.

Sunnyside Turnoff, Warm Springs Agency, BIA. IMT 2 (Watts). Five miles northeast of Warm Springs, OR. Timber, brush and grass. Smoldering with occasional interior torching.

* **Labrador**, Rogue River-Siskiyou NF. IMT 2 (Fillis). Fifteen miles northwest of Cave Junction, OR. Timber. Active fire behavior. Structures threatened. Road and area closures in effect.

Eastern Great Basin Area (PL 4)

New fires: 18
New large fires: 1
Uncontained large fires: 6
Type 2 IMTs committed: 3

* **Sheepshed**, Twin Falls District, BLM. Thirty miles west of Castleford, ID. Brush and grass. Running fire.

Lodgepole, Salmon-Challis NF. IMT 2 (Adell). Ten miles west of Challis, ID. Timber. Moderate fire behavior with occasional torching. Structures threatened. Evacuations and area closures in effect.

Ridge, Boise NF. IMT 2 (Wilde). Fourteen miles northeast of Lowman, ID. Timber. Moderate fire behavior with single tree torching.

Thunder City, Payette NF. IMT 2 (Johnson). Four miles northeast of Stibnite, ID. Timber. Creeping and smoldering with torching and short-range spotting.

Rush Lake, Cedar City Field Office, BLM. Eighteen miles north of Cedar City, UT. Pinyon pine, juniper, brush and grass. Creeping and smoldering.

Cinder Pit, Cedar City Field Office, BLM. Three miles north of Veyo, UT. Brush. Smoldering. Precipitation occurred over the fire area yesterday.

Goslin, Ashley NF. Four miles northeast of Dutch John, UT. Timber and grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

Predictive Services Discussion: Scattered showers and thunderstorms will develop across the Rockies from Wyoming to New Mexico with widely scattered storms over Utah. Isolated showers will also form over the Idaho Panhandle and northwestern Montana. Temperatures will be near normal over much of the West, with hot conditions in the far southwest. Much cooler conditions will spread over the northern Plains, the Upper Midwest, the Great Lakes, and the upper and mid-Mississippi Valley. Scattered showers and thunderstorms will move across the mid-Atlantic and New England. Warm and humid conditions will continue along the Gulf Coast region.

Hazard Trees – Situational Awareness

Hazard Tree Category

Snags (dead, standing trees without leaves or needles in the crowns) and green hazard trees present a significant threat to wildland firefighter safety. Snags typically have much lower fuel moistures than live, green trees; and they burn more readily. In the process, they often throw off embers creating spot fires in advance of the main fire. Snags may burn through more quickly than green trees and can fall without warning. Live, green trees weakened by insects, disease, weather, fire, and age presents another hazard and they can also fall without notice.

- The risk of serious injuries from hazard trees may increase during the night operational period when visibility is reduced.
- While work in cooler, nighttime environments can help control efforts, it also presents an increased risk from unseen falling snags and weakened live trees. Night operations should be restricted in areas of high risk rated dead and dying trees.
- Environmental conditions that increase risk from hazard trees: Strong or gusty winds from storm cells. Air operations - water or retardant drops, rotor wash from helicopters. Steep slopes with rolling material. Erosion and undercut root systems. Diseased or bug-killed areas (Mountain Pine Beetle).
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those that are known for rot and shallow root systems) in the area. Numerous downed trees/material. Broken tops and dead limbs overhead. Accumulation of downed limbs, tree decay, cavities, splits, cracks, lack of needles, bark, limbs or other indicators of overhead hazards. Roots damaged by equipment, fire or erosion create hazards.
- Mitigation measures to take: Identify and establish No-Work-Zones (NWZ) in all high-risk areas until the hazard has been mitigated. Instruct firefighters of established NWZ in briefings. Identify with flagging/signs, and show area on maps. Establish lookouts to protect NWZs. Assign only qualified sawyers and Falling Bosses. Order additional professional fallers in advance. Use heavy equipment, and blasters when appropriate. Plan a quick and safe escape routes. Do not turn your back on a falling tree or known hazard. Use lookouts to maintain secure felling areas. Maintain situational awareness.
