Predictive Services Discussion: Widely scattered thunderstorms will form over the Northwest ahead of an approaching upper level low. Strong, gusty winds will develop across the northern Great Basin. Very warm and dry conditions will continue in the Southwest. Isolated to widely scattered thunderstorms will also develop over the northern and central Rockies. Scattered showers and thunderstorms will move across the East from the Appalachians to the coast. Mild conditions will continue in the eastern half of the country with hot weather in the southern Plains.

POWER LINE SAFETY

Wildland / Urban Interface Category

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Keep all aviation activity away from power lines. Inform air attack and/or other aviation resources of the location of the power lines.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
