

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, June 4, 2013 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (111 new fires)  
 New large fires: 3 (\*)  
 Large fires contained: 1  
 Uncontained large fires: \*\* 10  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 3  
 \*\* Uncontained large fires include only fires being managed under a full suppression strategy.  
[Link](#) to Geographic Area daily reports.

**Southern California Area (PL 2)**

New fires: 19  
 New large fires: 0  
 Uncontained large fires: 2  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 1

**Powerhouse**, Angeles NF. Transfer of command from IMT 2 (Walker) to IMT 1 (Joseph) occurred yesterday. Fourteen miles northeast of Santa Clarita, CA. Brush. Moderate fire activity. Numerous structures, high-voltage power lines and a solar power plant threatened. Evacuations and road closures in effect.

**Branch**, Los Padres NF. Twenty-six miles northeast of Santa Maria, CA. Grass. Minimal fire activity.

Incident Name	St	Unit	Size	Size Chge 24 Hrs	% Ctn	Est Ctn	Totl Pers	Pers Chge 24 Hrs	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

**Southwest Area (PL 4)**

New fires: 16  
 New large fires: 0  
 Uncontained large fires: 3  
 Type 2 IMTs committed: 2

**Tres Lagunas**, Las Vegas District, New Mexico State Forestry. IMT 2 (Pierson). Fifteen miles north of Pecos, NM. Timber. Active fire behavior. Numerous structures threatened. Evacuations and area closures in effect.

**Thompson Ridge**, Bernalillo District, New Mexico State Forestry. IMT 2 (Day). Ten miles north of Jemez, NM. Timber. Active fire behavior with spotting. Structures and Native American cultural site threatened. Evacuations in effect.

**Beetown**, San Carlos Agency, BIA. Eighteen miles east of San Carlos, AZ. Brush. Minimal fire activity.

### Alaska Area (PL 2)

New fires: 11

New large fires: 2

Uncontained large fires: 3

**Bitter Creek**, Tok Area, Alaska DOF. Nine miles northwest of Northway Junction, AK. Timber. Creeping and smoldering. Structures threatened. Precipitation occurred over the fire area yesterday.

**Lime Hills**, Southwest Area, Alaska DOF. Ten miles northwest of Lime Village, AK. Grass. Minimal fire activity. Precipitation occurred over the fire area yesterday.

**Julie Creek**, Southwest Area, Alaska DOF. Five miles southwest of Iditarod, AK. Timber. Minimal fire activity.

\* **Mississippi**, Military Zone, BLM. Ten miles southwest of Delta, AK. Minimal fire activity. Last report unless significant activity occurs.

SA	8	1,822	37	16	1	85
Total	12	5,370	41	23	1	156

**Predictive Services Discussion:** Temperatures in the West will warm as high pressure builds over the area. Isolated afternoon thunderstorms will develop over the Sierras and parts of the southern Rockies. Showers and thunderstorms will develop across the Plains as an upper low moves toward the Great Lakes. Cool conditions will remain across the northern states from Montana to New England while warm and humid weather remains in the South.

## HAZARD MITIGATION THROUGH RISK MANAGEMENT

*Miscellaneous Category*

"Risk Management doesn't get in the way of doing the mission – ***it is the way we do the mission.***" The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

● Step 1—Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why discrepancies exist with information before proceeding.

● Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.

● Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.

● Step 4—Decision Point (decision to accept or not accept the risk(s) associated with an action):

- Consider whether controls are in place for identified hazards, whether selected tactics are based on expected fire behavior and if instructions have been given and understood.
- Make certain the decision is made at the appropriate level; if not, then elevate to a higher level.
- Reject the action if the risk is unacceptable.

● Step 5—Evaluation:

- Ensure controls are implemented and accomplished to standards.
- Supervise/evaluate effectiveness of controls and decisions. Stay on top of the situation and adjust risk controls as necessary.
- Anticipate consequences of decisions; if controls do not work, determine problem and derive a better solution.
- Adjust actions as the situation changes; maintain situational awareness at all times.
- Maintain feedback line

---

**Have an idea? Have feedback? Share it.**
