

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, June 8, 2013 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity: Light (81new fires)  
 New large fires: 0 (\*)  
 Large fires contained: 1  
 Uncontained large fires: \*\* 4  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 1  
 Type 2 IMTs committed: 2  
 \*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** Temperatures will continue to rise as high pressure remains over the West. Isolated thunderstorms will form over the Sierras and southern Rockies in the afternoon. A broad trough in the central and eastern U.S. will keep mild conditions in place with showers and thunderstorms over the northern and central Plains. Scattered thunderstorms will also dot the Southeast. Generally warm conditions will continue across much of central and southern Alaska with a few showers in the Southeast. A cold front entering the North will bring cooler weather and rain.

**SAFENET**  
*Miscellaneous Category*

SAFENET is a process that provides a method for reporting unsafe situations on or off the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
  - Electronically by accessing the SAFENET website at [safenet.nifc.gov](http://safenet.nifc.gov) or linking to it through the NIFC website.
  - Hardcopy is no longer available or accepted.
- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
  - Increase the chances of finding an immediate solution.
  - Keeps supervisor "in the loop."
- Discuss using SAFENET in situations other than fire.
  - Prescribed fire
  - All-risk
  - Training
- Where does a SAFENET go, and what response can you expect?
  - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. . The SAFENET doesn't get posted to the web until 2 business days after it has been forwarded to the affected agencies for corrective action.
  - Every new SAFENET is then forwarded to the affected agency's designated list of contacts, which usually includes the National or Regional Safety Officer.
  - It is each agency's responsibility to ensure that corrective actions are taken.
- Corrective actions should be submitted by people directly involved in mitigating the circumstances that led up to the unsafe situation. The submitter of the original SAFENET can use the "Immediate Action Taken" block of the SAFENET form to provide this information. Safety managers and line officers or supervisors may also file a corrective action to provide additional mitigation information.
- Discuss using SAFENET to monitor safety issues other firefighters may be having.

**Have an idea? Have feedback? Share it.**
