

**National Interagency Coordination Center
Incident Management Situation Report
Monday, June 10, 2013 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity: Light (93 new fires)
 New large fires: 3 (*)
 Large fires contained: 2
 Uncontained large fires: ** 6
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 4
 ** Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires: 12
 New large fires: 2
 Uncontained large fires: 4
 Type 2 IMTs committed: 3

Thompson Ridge, Bernalillo District, New Mexico State Forestry. IMT 2 (Day). Ten miles north of Jemez, NM. Timber. Interior burning with torching. Structures threatened. Evacuations in effect.

Tres Lagunas, Las Vegas District, New Mexico State Forestry. IMT 2 (Pierson). Fifteen miles north of Pecos, NM. Timber. Creeping and smoldering with isolated torching. Structures threatened. Area closures in effect.

* **Silver**, Gila NF. IMT 2 (Reidy). Six miles west of Kingston, NM. Timber. Extreme fire behavior. Evacuations and road closures in effect.

* **Fourmiles**, San Carlos Agency, BIA. Twenty miles northeast of Morenci, AZ. Grass. Moderate fire activity.

Predictive Services Discussion: Scattered showers and thunderstorms will increase over the Sierras and the northern Rockies as the upper ridge in the West continues to weaken. Isolated afternoon thunderstorms are possible in the central and southern Rockies. Windy and dry conditions will develop across the Southwest. Drier and warmer weather will spread northward across the Plains. Scattered showers and thunderstorms will cover much of the East. Cool temperatures will remain over northern and central Alaska with lingering showers in the North and Interior. Mild and dry conditions will continue in the South.

AVIATION COMMUNICATIONS

Aviation Category

Discuss the following information in terms of effective communication with aircraft. Involve the pilot in this discussion.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.
- Avoid switching frequencies in the middle of an operational period.
- Discuss Guard frequencies:
 - How they work.
 - When to use them.
 - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people you are talking to. Do not use local slang.
- Know what you want to say before you key the microphone. Don't think and talk at same time.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling. Use a common frame of reference for the sender and receiver.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
