

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 12, 2013 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (141 new fires)
New large fires:	8 (*)
Large fires contained:	1
Uncontained large fires: **	13
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

A smokejumper assigned to the Saddle Back fire on the Modoc National Forest near Alturas, CA, was fatally injured by a falling tree on June 10. The firefighting community extends condolences to family and friends of the deceased.

Southwest Area (PL 4)

New fires:	6
New large fires:	1
Uncontained large fires:	4
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Silver, Gila NF. IMT 2 (Reidy). One miles west of Kingston, NM. Timber. Backing fire with single and group tree torching. Structures threatened. Evacuations and road closures in effect.

* **Jaroso**, Santa Fe NF. IMT 1 (Sciacca). Eight miles south of Truchas, NM. Timber. Extreme fire behavior with long-range spotting.

Tres Lagunas, Las Vegas District, New Mexico State Forestry. IMT 2 (Pierson). NIMO ordered. Fifteen miles north of Pecos, NM. Timber. Creeping and smoldering with isolated torching. Structures threatened. Area closures in effect.

Thompson Ridge, Bernalillo District, New Mexico State Forestry. IMT 2 (Day). Ten miles north of Jemez, NM. Timber. Interior burning. Structures threatened. Evacuations in effect.

Fourmile, San Carlos Agency, BIA. Twenty miles northwest of Morenci, AZ. Grass. Moderate fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion: An upper low will enter the Northwest, amplifying a ridge over the Rockies and central U.S. Scattered showers and a few thunderstorms will move across the Northwest and northern Rockies. Strong and gusty winds and low humidity will develop across the Great Basin, Southwest and central Rockies. Meanwhile, a broad trough over the East will produce scattered thunderstorms across the Ohio Valley, the mid-Atlantic and New England. Hot and humid conditions will return to the South. In Alaska, warm and dry conditions will continue.

MANAGING VEHICLE TRAFFIC IN SMOKE

Environmental Factors Category

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
 - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
 - Notify local law enforcement units and highway departments of a potential problem.
 - Implement preplanned actions such as posting smoke warning signs.
 - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
