

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, June 13, 2013 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (77 new fires)
New large fires:	3 (*)
Large fires contained:	2
Uncontained large fires: **	14
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve) are supporting wildland fire suppression operations out of Colorado Springs, CO.

Southwest Area (PL 4)

New fires:	7
New large fires:	0
Uncontained large fires:	4
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Walker's Area Command Team is assigned to provide assistance to Region 3 (FS) and GMAC in support of ongoing suppression, planning, logistical and aviation operations.

Quesinberry's NIMO is assigned to provide strategic management and oversight for coordination of BAER and remaining suppression activities on the Tres Lagunas and Thompson incidents.

Silver, Gila NF. IMT 2 (Reidy). One mile west of Kingston, NM. Timber. Backing fire with single and group tree torching. Structures threatened. Evacuations and area closures in effect.

Jaroso, Santa Fe NF. IMT 1 (Sciacca). Eight miles south of Truchas, NM. Timber. Active fire behavior with spotting and group tree torching.

Tres Lagunas, Las Vegas District, New Mexico State Forestry. Transfer of command from IMT 2 (Pierson) back to the local unit will occur tomorrow. Fifteen miles north of Pecos, NM. Timber. Creeping and smoldering with active torching. Structures threatened. Area closures in effect.

Thompson Ridge, Bernalillo District, New Mexico State Forestry. IMT 2 (Day). Ten miles north of Jemez, NM. Timber. No new information.

Fourmile, San Carlos Agency, BIA. Twenty miles northwest of Morenci, AZ. Grass. Moderate fire behavior. Last report unless significant activity occurs.

Predictive Services Discussion: An upper low moving into the Northwest and high pressure settling over the southern Plains will produce hot, dry and windy conditions for much of the Southwest, then central and southern Rockies, and the Great Basin. Isolated to widely scattered thunderstorms will develop over New Mexico and southern Colorado. Cooler conditions will spread into the Northwest and northern Rockies as a cold front pushes through the region. The South will continue to be hot and humid with scattered thunderstorms moving through the Gulf States. High pressure over the Great Lakes region will bring mild temperatures to the North and scattered showers and thunderstorms along the Eastern Seaboard. Alaska will continue to be warm and mostly dry with a few thunderstorms in the southeast.

FREQUENT SPOT FIRES ACROSS THE LINE

Weather / Fire Behavior Category

There are few watchout situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if you are getting spot fires across your line:

- Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)
- What is your probability of ignition doing? Is it increasing or decreasing?
- Do you have a plan for long-range spotting? In what fuel type and under what conditions will you likely have long-range spotting? What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.
- Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack that is busy with air tankers?)
- Where are you in the burning period? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.
- To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
