

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 22, 2013 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (117 new fires)
New large fires:	6 (*)
Large fires contained:	2
Uncontained large fires: **	21
Area Command Teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 aircraft and support personnel from the 302nd Airlift Wing, Colorado Springs (US Air Force Reserve) are supporting wildland fire suppression operations out of Colorado Springs, CO.

Rocky Mountain Area (PL 4)

New fires:	6
New large fires:	5
Uncontained large fires:	9
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

West Fork Complex, (two fires), San Juan NF. NIMO (Houseman) and IMT 1 (Blume). IMT is also managing the Papoose incident. Fifteen miles north of Pagosa Springs, CO. Timber. Extreme fire behavior with long-range spotting. Numerous structures threatened. Evacuations and area closures in effect.

East Peak, Huerfano County. IMT 2 (Esperance). Ten miles southwest of Walsenburg, CO. Timber and grass. Active fire behavior with occasional torching. Numerous structures threatened. Evacuations in effect. Reduction in acreage due to more accurate mapping.

Lime Gulch, Pike and San Isabel NF. IMT 2 (Dallas). Four miles north of Buffalo Creek, CO. Timber. Group torching with short-range spotting. Residences threatened. Evacuations and area closures in effect. Reduction in acreage due to more accurate mapping.

Bull Gulch, Royal Gorge Field Office, BLM. Twenty miles east of Salida, CO. Timber. Creeping with torching and spotting. Structures and power line threatened.

* **Brush Creek**, Glenwood Springs Field Office, BLM. Ten miles north of Rifle, CO. Timber. Extreme fire behavior. Structures threatened.

* **East Fork**, Grand Mesa/Uncompahgre/Gunnison NF. Fifteen miles east of Ridgeway, CO. Timber. Torchng and spotting. Structures threatened. Evacuation and area closures in effect.

Wild Rose, White River Field Office, BLM. IMT 2 (Del Grosso). Twenty-one miles south of Rangely, CO. Timber and grass. Moderate fire behavior. Structures threatened. Road closures in effect.

* **Collins**, White River Field Office, BLM. Twenty miles southwest of Meeker, CO. Timber. Torching and spotting. Oil and gas site and power line threatened.

* **Trickle Mountain**, Rio Grande NF. Fourteen miles west of Saguache, CO. Timber. Active fire behavior.

* **Papoose**, Rio Grande NF. Twenty miles southwest of Creede, CO. Timber. Active fire behavior. Structures threatened. Evacuations and road closures in effect.

Wild-Hacking Complex (two fires), Dinosaur NP. Twenty-five miles north of Dinosaur, CO. Brush. Minimal fire behavior.

Predictive Services Discussion: Strong afternoon winds combined with humidity in the single digits and teens will continue from California eastward to Colorado and New Mexico. Scattered showers and thunderstorms will continue over the northern tier of states as well as east of the Continental Divide. In Alaska, temperatures will cool with scattered showers and thunderstorms over the northern interior

Roadside Incident Response

Fireline Safety Category

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

● Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

● Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

● Risk Management Process-

- Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

● Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
 - Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
 - Park units on the same side of the roadway whenever possible to avoid traffic congestion.
 - Personnel do not exit the fire apparatus until instructed to do so by the module leader.
 - Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
 - Exit the fire apparatus with full personal protective equipment.
 - Post a lookout to watch for and control oncoming traffic.
 - Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
 - Utilize and place road flares or other traffic warning signs whenever possible
 - If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.
 - Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
 - During night operations utilize reflective clothing, vests and other safety equipment as necessary.
 - All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
 - Cancel or demob unnecessary apparatus as soon as possible.
- *** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.*
