

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, June 27, 2013 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (84 new fires)
New large fires:	3 (*)
Large fires contained:	2
Uncontained large fires: **	10
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Four MAFFS C-130 aircraft and support personnel from the 302<sup>nd</sup> Airlift Wing, Colorado Springs (US Air Force Reserve), and the 146<sup>th</sup> Airlift Wing, Channel Islands (California Air National Guard) are supporting wildland fire suppression operations out of Colorado Springs, CO.

**Rocky Mountain Area (PL 4)**

New fires:	5
New large fires:	0
Uncontained large fires:	2
Area Command Teams committed:	1
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Area Command Team (Loach) is assigned to the West Fork Complex in support of Forest Service Region 2.

**West Fork Complex**, (three fires), San Juan NF. NIMO (Houseman) and IMT 1 (Blume). Fifteen miles north of Pagosa Springs, CO. Timber. Isolated torching. Numerous structures threatened. Evacuations and area closures in effect.

**East Peak**, Huerfano County. IMT 2 (Esperance). Ten miles southwest of Walsenburg, CO. Timber and grass. Interior burning. Numerous structures threatened. Evacuations in effect.

**East Fork**, Grand Mesa/Uncompahgre/Gunnison NF. IMT 2 (Kusicko). Thirty miles southeast of Montrose, CO. Timber. Creeping and smoldering with isolated torching and short-range spotting. Structures threatened.

**Ox Cart**, Rio Grande NF. IMT 2 (Dunford). Nine miles north of Villa Grove, CO. Timber. Active fire behavior with group torching and spotting. Area closures in effect.

**Brush Creek**, Glenwood Springs Field Office, BLM. Ten miles north of Rifle, CO. Timber. Minimal fire behavior.

#### **Southwest Area (PL 4)**

New fires: 12  
New large fires: 0  
Uncontained large fires: 7  
Type 2 IMTs committed: 3

**Jaroso**, Santa Fe NF. IMT 2 (McBratney). Eight miles south of Truchas, NM. Timber. Active fire behavior.

**Silver**, Gila NF. IMT 2 (Pierson). One mile west of Kingston, NM. Timber. Extreme fire behavior. Structures threatened. Area closures in effect.

**Creek**, San Carlos Agency, BIA. Forty miles northwest of Safford, AZ. Timber and grass. Moderate fire behavior.

**Doce**, Prescott NF. Seven miles northwest of Prescott, AZ. Timber and brush. Interior burning.

**Rock Creek**, Fort Apache Agency, BIA. Transfer of command from IMT 2 (Philbin) back to the local unit will occur today. Eight miles east of Whiteriver, AZ. Timber. Minimal fire behavior.

**Sycamore**, Papago Agency, BIA. Seventeen miles southeast of Sells, AZ. Grass. Minimal fire behavior.

**Thompson Ridge**, Bernalillo District, New Mexico State Forestry. Ten miles north of Jemez Springs, NM. Timber and grass. Minimal fire behavior.

**Tres Lagunas**, Las Vegas District, New Mexico State Forestry. Fifteen miles north of Pecos, NM. Timber. Creeping and smoldering. Structures threatened. Area closures in effect.

**Alaska Area (PL 3)**

New fires: 21  
 New large fires: 3  
 Uncontained large fires: 1

**Lime Hills**, Southwest Area Forestry, Alaska DOF. Ten miles northwest of Lime Village, AK. Black spruce and tundra. Active fire behavior with spotting. Structures threatened.

**Moore Creek**, Southwest Forestry, Alaska Fire Service. Previously reported incident. Forty miles southwest of McGrath, AK. Timber. Moderate fire behavior. Last report unless significant activity occurs.

**Beaver Log Lakes**, Tanana Zone, Alaska Fire Service. Fifteen miles northeast of Minchumina Lake, AK. Black spruce and tundra. Running, torching and spotting. Structures threatened.

**Chisana River**, Tok Area Forestry, Alaska DOF. Started on FWS land seventy-six miles southeast of Tok, AK. Active fire behavior.

\* **Moon Lake**, Tok Area Forestry, Alaska DOF. Seven miles west of Tok, AK. Timber. Backing fire with upslope runs.

**Kristin Creek**, Southwest Area Forestry, Alaska DOF. Forty miles southeast of Lime Village, AK. Black spruce and tundra. Moderate fire behavior with single tree torching. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

\* **Dead Fish Lake**, Tanana Zone, Alaska Fire Service. Nineteen miles northeast of Lake Minchumina, AK. Black spruce and tundra. Running, torching and spotting. Last report unless significant activity occurs.

\* **Stuart Creek #2**, Upper Yukon Zone, Alaska Fire Service. Twenty-five miles east of North Pole, AK. Timber and grass. Running and torching. Structures threatened. Last report unless significant activity occurs.

**Predictive Services Discussion:** Strong high pressure will build over the West. A few showers and thunderstorms will develop over northern Washington and Idaho. Isolated high-based thunderstorms will also develop late in the day over the southern Rockies. Scattered thunderstorms and rain will move from the Mississippi Valley to the East Coast. Temperatures will soar to 100-115 across much of the Southwest while readings will rise into the 90s across much of the remainder of the West. East of the Rockies, temperatures will remain warm over the Plains to mild in the Northeast. In Alaska, hot and dry conditions will continue with only a few thunderstorms across the south.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

## LCES – June 1991

***“The afternoon of June 26, 1990, as I knelt beside a dead Perryville firefighter, I made a promise to the best of my ability to help end the needless fatalities, and alleviate the near misses, by focusing on training and operations pertinent to these goals.”*** Paul Gleason from [“LCES and Other Thoughts”](#) published June 1991.

*(Note: Gleason had used LCES with his crew the Zig Zag IHC for several years but it was the Dude Fire fatalities that became the catalyst for LCES to hit the mainstream.)*

“LCES is just a re-focusing on the essential elements of the FIRE ORDERS. The systems view stresses the importance of the components working together. The LCES system is a result of analyzing fatalities and near misses for over 20 years of active fireline suppression duties. I believe that all firefighters should be given an interconnecting view of Lookout(s), Communications(s), Escape routes and Safety zone(s).” Paul Gleason

Gleason cites two types of hazards:

- Subjective hazards are those which one has direct control over (e.g., condition of the equipment, choices and decisions).
- Objective hazards are a natural part of the environment (e.g., lightning, fire-weakened timber, rolling rocks, entrapment). They cannot be eliminated and one must either 1) not go into the environment where they exist or 2) adhere to a procedure where safety from the hazard is assured.

Gleason suggested that LCES is the key to this safe procedure in an environment of hazards and that LCES must be established AND communicated to ALL firefighters BEFORE it is needed.

Lookouts need to be in a position where *both* the objective hazard and the firefighters can be seen. Lookouts must be trained to observe the wildland fire environment and to recognize and anticipate changes in fire behavior. The whole idea is when the objective hazard becomes a danger the Lookout relays the information to the firefighters so they can reposition to the safety zone or safer area.

- What are the objective hazards that a Lookout is looking for?
- What are the tools and skills that a good Lookout should possess?
- Discuss how your crew can utilize a roving Lookout.
- Discuss how each person on your crew/team has a role and responsibility in recognizing and communicating hazards.

Communications is the vehicle which delivers the message to the firefighters, alerting them of the approaching hazard. Communications must be prompt and clear.

- Radios are limited and it is vital to have at least one back up way to quickly Communicate information. Discuss some options that your crew/team can use in this situation.
- Using page ix in your IRPG, discuss the 5 Communication responsibilities every firefighter has. Identify how your crew/team will translate these ideas into action when working in the field.

Escape routes are the paths firefighters take from their current location, in which they are exposed to danger, to an area free from danger. Unlike the other components, there must always be more than one Escape route available to the firefighter. With their effectiveness continually changing, Escape routes are probably the most elusive component of LCES. As the firefighter works along the fire perimeter, fatigue and spatial separation increases the time required to reach the safety zone. On indirect or parallel fireline, situations become compounded. Unless Escape routes have been identified ahead, as well as behind, a firefighter's retreat may not be possible.

- Using your IRPG page 6, discuss qualities of effective Escape routes.

Safety Zones are planned locations where firefighters may find refuge from danger and where no fire shelter is needed. Fireline intensity and Safety zone topography determine its effectiveness.

- **Activity:** Using your IRPG page 7, mark off a Safety zone that would be effective for the area you are currently in or often work in. Being able to see just how big a Safety zone will have to be to become effective can help us choose one quicker in the field. *(FYI: The Safety zone guidelines in the IRPG are for no-wind and no-slope conditions. Make necessary adjustments in size to reflect realistic slope and wind.)*
