

National Interagency Coordination Center
Incident Management Situation Report
Friday, March 22, 2013 – 0800 MT
National Preparedness Level 1

National Fire Activity (Weekly Total)

Initial attack activity: Light (1,138 new fires)

New large fires: 20 (*)

Large fires contained: 17

Uncontained large fires: ** 4

Area Command Teams committed: 0

NIMOs committed: 0

Type 1 IMTs committed: 0

Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 1)

New fires: 1,000

New large fires: 17

Uncontained large fires: 3

* **Haney**, Osage Agency, BIA. Six miles east of Hominy, OK. Hardwood litter. Active fire behavior with long-range spotting. Structures threatened.

* **Sleeper**, Wewoka Agency, BIA. Four miles west of Cromwell, OK. Hardwood litter. Backing fire. Structures threatened.

* **Opening Day**, Florida Forest Service. Fourteen miles northwest of Melbourne, FL. Grass. No further information received.

Predictive Services Discussion: A broad trough will remain across the U.S. through the weekend, bringing a Pacific storm across the Northwest and northern Rockies by Saturday and across the Gulf States by Monday. This storm will move into the Mid-Atlantic States and offshore by midweek. Cold high pressure will remain over the central and eastern U.S., while temperatures warm in the West under building high pressure.

Static Electricity Hazards

Miscellaneous Category

The National Institute for Occupational Safety and Health (NIOSH) has reported incidents of fire spontaneously igniting when workers attempted to fill portable gasoline cans in the backs of pickup trucks equipped with plastic bed liners, or in cars with carpeted surfaces.

- These fires result from the buildup of static electricity. The insulating effect of the bed liner prevents the static charge generated by the flowing gasoline from grounding. The discharge of this buildup to the grounded nozzle may cause a spark and ignite the gasoline. Both ungrounded metal (most hazardous) and plastic gas containers have been involved in these incidents.

- To prevent this from occurring, NIOSH recommends:
 - Always place the gas can on the ground before refueling.
 - Touch can with gas dispenser nozzle before removing can lid.
 - Keep gas dispenser nozzle in contact with can inlet when filling.
 - Do not re-enter your vehicle when refueling, so as to prevent static discharge from occurring while moving across carpeted surfaces.
