

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 27, 2013 – 0530 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (109 new fires)
 New large fires: 1 (*)
 Large fires contained: 2
 Uncontained large fires: ** 2
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 0
 Type 2 IMTs committed: 0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: A trough over the western U.S. will produce showers and thunderstorms over the Northwest and the northern Rockies. Strong southwesterly flow aloft and warm conditions at the surface will spread near critical fire weather conditions across parts of New Mexico and west Texas. A low pressure system in the Plains will trigger strong thunderstorms from the Dakotas to Oklahoma. In the East, scattered showers and thunderstorms will dot the Ohio Valley.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Fireline Safety Category

Every firefighter will be giving and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the National Incident Response Pocket Guide standards briefing checklist?
- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is registering?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
 - Task
 - Location
 - Communications
 - Hazards
 - Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
 - Did you really listen? What do you do to make yourself pay attention to everything being said?
 - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
 - What is to be done?
 - Who you are to report to and how often to report.
 - When you are expected to complete the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.
