

**National Interagency Coordination Center  
Incident Management Situation Report  
Tuesday, October 1, 2013 – 0530 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial attack activity: Light (29 new fires)  
 New large fires: 0 (\*)  
 Large fires contained: 0  
 Uncontained large fires: \*\* 1  
 Area Command Teams committed: 0  
 NIMOs committed: 0  
 Type 1 IMTs committed: 0  
 Type 2 IMTs committed: 0

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern California Area (PL 2)**

New fires: 14  
 New large fires: 0  
 Uncontained large fires: 1

**Rim**, Stanislaus NF. Two miles northeast of Buck Meadows, CA. Timber, brush and grass. Minimal fire behavior. Structures threatened. Evacuations in effect.

**Predictive Services Discussion:** For the latest daily weather forecast, please consult the National Weather Service graphical forecasts for the U.S. at: <http://graphical.weather.gov/sectors/conusWeek.php#tabs>

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Today's discussion is from the  
Fireline Safety Category.

## ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

When firefighters find themselves in Watchout Situation #13, they must answer the following questions:

- Can you locate/construct a line to prevent material from rolling below? What do you call line that catches rolling material? Describe how you would construct this type of line and what factors you would have to consider (e.g., slope, fuels, etc.)
- Will you get enough warning of rolling material to prevent being hit by it? Who needs to be watching for rolling material? What kinds of warning systems could you establish?
- Can you see where any material that rolls below you goes and what it does? What can happen when material rolls out of the fire and below you out of view? What needs to be done to mitigate this danger?
- Is the area free of large amounts of flashy fuels? Review the Common Denominators of Tragedy Fires.
- Is the area free of chimneys, gullies, and steep slopes? Review the Common Denominators of Tragedy Fires.
- Do you have two escape routes so you can go either way? Talk about where your most likely escape routes and safety zones will be when you are on a hillside where rolling material can ignite fuel below.
- To reduce the risks:
  - Post lookouts.
  - Consider locating line in a defensible position. Talk about steep fires where you have had material rolling out below you and how you dealt with it.
