**Predictive Services Discussion:** Scattered thunderstorms will form across the Southwest, the eastern Great Basin, and the central Rockies. Widely scattered showers and thunderstorms will also form over the Great Lakes region and New England. Temperatures will remain cool to mild across the Rockies and the northern Plains. The West will be warm with hot conditions in the central valley of California. Very warm to hot conditions will spread over the central and southern Plains, the Mississippi Valley and the Southeast. The Northeast will be cool.

## LOOKOUTS

*LCES (Lookouts, Communication, Escape Routes, and Safety Zones)  
Category*

Lookouts are often better situated to notice the cumulative changes of fire behavior.

- Fire Order #5 says "Post lookouts when there is possible danger." Should you utilize lookouts at all times?
  - Lookouts should be posted at all times.
- What are you looking for when you are selecting a lookout location?
  - Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
  - Never rely exclusively on aircraft as your lookout.
- What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?
  - Experienced firefighter.
  - Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.
  - Knowledge of crew locations, escape and safety locations and trigger points.
  - Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.
  - Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.
- What is the necessary equipment for a lookout?
  - PPE, radio with extra batteries, compass, binoculars, belt weather kit, IAP, map, food, water and watch.
