

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 11, 2013 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (93 new fires)
New large fires:	2 (*)
Large fires contained:	0
Uncontained large fires: **	11
Area Command Teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	0

** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	25
New large fires:	0
Uncontained large fires:	4
Type 1 IMTs committed:	3

Clover, Shasta-Trinity Unit, Cal Fire. Cal Fire IMT 1 (Smith). Ten miles west of Red Bluff, CA. Timber brush and grass. Moderate fire activity with spotting. Communities of Igo, Ono and Cottonwood are threatened. Evacuations in effect. Reduction in acreage due to more accurate mapping.

Morgan, Santa Clara Unit, Cal Fire. Cal Fire IMT 1 (Derum). Four miles southeast of Clayton, CA. Chaparral. Creeping and smoldering. Reduction in acreage due to more accurate mapping.

Forks Complex, Klamath NF. One mile east of Sawyers Bar, CA. Timber and brush. Moderate fire behavior. Structures threatened.

Corral Complex, Six Rivers NF. Transfer of command from IMT 1 (Pincha-Tulley) back to the local unit will occur tomorrow. Ten miles east of Hoopa, CA. Timber and brush. Interior smoldering. Area closures in effect.

Predictive Services Discussion: Scattered showers and thunderstorms, some with heavy rain, will develop over the Southwest, the central and eastern Great Basin and the central Rockies. Scattered thunderstorms will also form over New England, the Great Lakes and the Ohio Valley. Temperatures will remain cool to mild from Montana to Arizona and New Mexico. Warm to very warm conditions will continue across the West Coast states and over much of the central and eastern U.S.

SERIOUS INJURY PROCEDURES

First Aid / Health Category

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
 - Number of people injured
 - Type of injuries
 - Severity of injuries (light, moderate, severe, life threatening)
 - Mechanism of injury
 - Vital signs (pulse, respirations, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
