Two MAFFS C-130 air tankers and support personnel from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

Two MAFFS C-130 air tankers and support personnel from the 146<sup>th</sup> Airlift Wing (California Air National Guard) have been deployed to McClellan, CA, in support of the State of California.

**Northwest Area (PL 5)**

New fires:	40
New large fires:	3
Uncontained large fires:	18
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

**Snag Canyon**, Southeast Region, DNR. IMT 2 (B. Johnson). Started on private land twelve miles north of Ellensburg, WA. Timber, brush and grass. Active fire behavior with torching and spotting. Numerous residences threatened. Evacuations in effect.

**Beaver Complex (2 fires)**, Medford Unit, Oregon DOF. Unified command between IMT 2 (Cline) and Cal Fire. Twenty-one miles southeast of Ashland, OR. Timber and brush. Active fire behavior. Numerous structures and energy infrastructure are threatened. Evacuations in effect.

\* **Little Bridge Creek**, Okanogan/Wenatchee NF. IMT 2 (Leitch). Ten miles west of Winthrop, WA. Timber. Moderate fire behavior with torching and short-range spotting. Numerous residences threatened. Area closures in effect.

**Chiwaukum Complex**, Okanogan/Wenatchee NF. IMT 1 (Dueitt). Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Active fire behavior with torching and spotting. Numerous structures threatened. Area closure in effect.

**Carlton Complex**, Northeast Region, DNR. IMT 1 (Blume). Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Interior burning. Numerous structures threatened. Evacuations, area and road closures in effect.

**South Fork Complex, (2 fires)**, Prineville District, BLM. IMT 2 (Watts). Twenty miles south of John Day, OR. Timber and grass. Active fire behavior. Structures threatened.

**Camp Creek Complex**, Rogue River-Siskiyou NF. IMT 1 (Lewis). Thirty miles northeast of Medford, OR. Timber. Moderate fire behavior with isolated torching.

**Logging Unit Complex (5 fires)**, Warm Springs Agency, BIA. IMT 2 (Williams). Twenty-five miles northwest of Warm Springs, OR. Timber, medium logging slash and brush. Creeping and smoldering. Structures threatened.

**Castle**, Deschutes NF. IMT 2 (Fillis). Twenty-five miles north of Sisters, OR. Timber and grass. Minimal fire behavior. Area closure in effect. Reduction in acreage due to more accurate mapping.

**Bald Sisters**, Malheur NF. NIMO (Quesinberry). Twelve miles east of Prairie City, OR. Timber. Active fire behavior with torching and spotting.

\* **5 mile**, Wallowa Unit, Oregon DOF. IMT 2 (D. Johnson). IMT is also managing the Somers fire. One mile south of Imnaha, OR. Timber and grass. Running with crowning and short-range spotting. Structures threatened.

\* **Somers**, Wallowa-Whitman NF. Fifteen miles east of Imnaha, OR. Grass. Creeping and smoldering. Residence threatened.

**Nene Creek**, Warm Springs Agency, BIA. Twenty-two miles north of Warm Springs, OR. Timber, brush and grass. Active fire behavior with torching and short-range spotting. Structures threatened.

**Staley Complex**, Willamette NF. Twenty-eight miles south of Oakridge, OR. Timber. Creeping and smoldering with isolated torching.

**Hurricane Creek**, Wallowa-Whitman NF. Previously reported incident. Four miles southwest of Joseph, OR. Timber. Active fire behavior with torching. Residences threatened. Last report unless significant activity occurs.

### Northern California Area (PL 5)

New fires:	17
New large fires:	0
Uncontained large fires:	9
Type 1 IMTs committed:	6
Type 2 IMTs committed:	2

**Eiler**, Lassen NF. Unified command between IMT 2 (Minton) and Cal Fire IMT 1 (Smith). Six miles northwest of Old Station, CA. Timber and brush. Extreme fire behavior with group torching and long-range spotting. Numerous residences and energy infrastructure threatened. Evacuations, area and road closures in effect.

**Bald**, Lassen NF. Unified command between IMT 2 (Minton) and Cal Fire IMT 1 (Zombro). Eight miles southeast of Fall River Mills, CA. Timber, chaparral and grass. Moderate fire behavior with short runs, isolated torching and spotting. Residences, railroad and power infrastructure threatened. Evacuations and area closures in effect.

**Day**, Lassen-Modoc Unit, Cal Fire. Cal Fire IMT 1 (Michael). Twelve miles north of McArthur, CA. Timber and brush. Moderate fire behavior.

**KNF Beaver**, Klamath NF. IMT 2 (M. Johnson). Started on private land nine miles northeast of Horse Creek, CA. Timber and brush. Backing with occasional group torching. Structures threatened. Evacuations and road closure in effect.

**Lodge Complex**, Mendocino Unit, Cal Fire. Cal Fire IMT 1 (Derum). Twelve miles northwest of Laytonville, CA. Timber. Creeping and smoldering. Structures threatened. Evacuations in effect.

**Coffee**, Shasta-Trinity NF. IMT 1 (Pincha-Tulley). Twenty-nine miles north of Weaverville, CA. Timber, brush and grass. Active fire behavior. Numerous residences threatened.

**Little Deer**, Klamath NF. Twenty-two miles northeast of Weed, CA. Timber. Active fire behavior with group torching and short-range spotting. Railroad infrastructure and high voltage powerlines are threatened. Road closures in effect.

**July Complex**, Klamath NF. IMT 1 (McGowan). Seven miles east of Sawyers Bar, CA. Timber. Active fire behavior with group torching and long-range spotting. Residences threatened. Area closures in effect.

**Log**, Klamath NF. Previously reported under the July Complex. Unified command between IMT 1 (McGowan) and Cal Fire. Six miles west of Greenview, CA. Timber. Short crown runs and spotting. Numerous structures threatened. Area closure in effect.

**Predictive Services Discussion:** Scattered thunderstorms and rain are expected again today for much of the Great Basin and northern California as well as the northern and central Rockies. Heavy rain is expected with some of these storms in the Great Basin. Heavier storms are also expected along a cold front stretching from the high Plains eastward to the Mississippi Valley. Tropical moisture and instability from Hurricane Bertha will provide a focus for showers and thunderstorms along the Gulf Coast and Florida.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

**This Day in History** is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## The Mann Gulch Fire - August 5<sup>th</sup>, 1949

**Summary:** Lightning started many fires on the Helena National Forest August 4<sup>th</sup>, 1949 including one near the top of a ridge between Meriwether and Mann Gulches. At 12:55pm August 5<sup>th</sup>, the fire was observed at 6 acres. At 1:30 the call went out for smokejumpers from the Missoula jump base. By the time the jump plane flew over at 3pm the fire was 60 acres. The crew jumped and are scattered by a nearby thunder cell.

The crew gathers at the bottom of the gulch up-canyon of the fire. Jumper Foreman goes to scout the fire and meets up with a fire guard working alone near the head of the fire. Observing increased fire activity, the decision is made to start from the toe. While hiking to the toe, the foreman noted that there was fire below them in the gulch and that it had crossed to the other side of the canyon blocking their ability to escape to the river. They reversed direction and headed up toward the NW ridge. The fire is 500 feet behind them crowning in timber and dog hair thickets.

The foreman knows that they will not outrun the fire and starts to burn off some grass for a "refuge". He gives the order for his crew to come into the black with him. The foreman stayed in his black and survived the fire passing over. It is not clear how many of the crew heard the orders over the roar of the fire or understood what the foreman was trying to do (burning out was neither taught nor common practice at this time). The crew continued running up the steep slope for the ridge. Two made it to safety in rocks at the top. 5:56pm marks the time on one firefighter's watch that stopped when the 15 Missoula Smokejumpers and one Meriwether Fire Guard were burned over. Only 5 would survive the blow-up. 2 would die from their burns the next day.

**This Day in Wildland Fire History is dedicated to all those at Mann Gulch August 5<sup>th</sup>, 1949.**

Predicted Fire Danger was "low" but readings from a nearby ranger station were RH=22%, fuel sticks = 5%, and wind=16mph indicating more severe fire danger. No weather was recorded at the fire, but steady SW winds were observed at the time of the jump. The Gulch runs SW down to the Missouri River. Also note the thunder cell that was in the area.

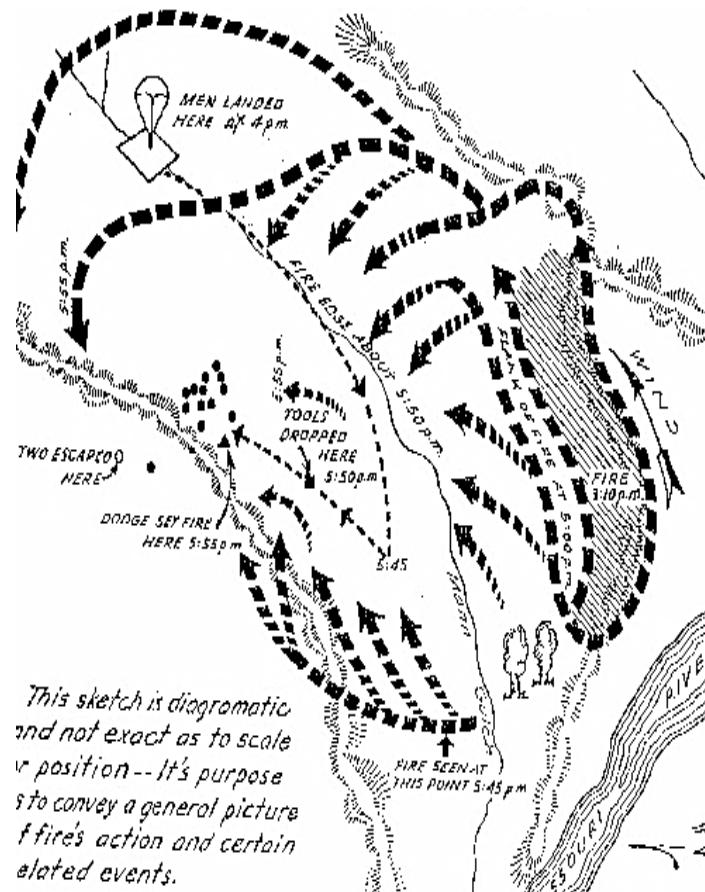

- Open your IRPG to page 1. Based on the above information coupled with the increase in fire size, use the Risk Management Process and the map (right) to discuss some of the actions you will take to ensure crew safety: as the FFT2, squad boss, crew boss, etc.

Based on initial aerial size-up, the strategy was to hold the fire on the ridge by anchoring the head of the fire and flanking down both sides to the toe. The fire was noted as "appearing relatively quiet".

- Discuss other tactics that your crew could use if presented with a similar situation. Look at the different options available at different steps of the initial attack.

Though his ability as a firefighter was well respected by his peers, the Foremen was not known by this young group of smokejumpers.

- When we find ourselves in this position (such as a Crew boss assignment) what can we do to create and encourage crew cohesion?
