

**National Interagency Coordination Center  
Incident Management Situation Report  
Saturday, August 9, 2014 – 0530 MT  
National Preparedness Level 4**

**National Fire Activity**

Initial attack activity:	Light (78 new fires)
New large fires:	4 (*)
Large fires contained:	0
Uncontained large fires: **	31
Area Command Teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	10
Type 2 IMTs committed:	19

\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Two MAFFS C-130 air tankers and support personnel from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) have been deployed to Boise, ID to support wildland fire suppression operations in the western U.S.

**Northwest Area (PL 5)**

New fires:	9
New large fires:	3
Uncontained large fires:	16
NIMOs committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	11

**Rowena**, The Dalles Unit, Oregon DOF. IMT 2 (Buckman). Five miles northwest of The Dalles, OR. Timber, brush and grass. Backing fire. Numerous structures threatened. Evacuations in effect.

**Devils Elbow Complex** (2 fires), Colville BIA. IMT 2 (Nickey). Thirty miles west of Nespelem, WA. Timber and grass. Active fire behavior with crown runs and long-range spotting. Numerous structures threatened. Evacuations and road closures in effect.

**Snag Canyon**, Southeast Region, DNR. IMT 2 (B. Johnson). Started on private land twelve miles north of Ellensburg, WA. Timber, brush and grass. Active fire behavior with short crown runs and short-range spotting. Numerous residences threatened. Evacuations and area closures in effect.

\* **Hansel Creek**, Southeast Region, DNR. Transfer of command from IMT 1 (Dueitt) to IMT 1 (Schulte) will occur today. IMT is also managing the Chiwaukum Complex and Duncan fire. Previously reported incident under the Chiwaukum Complex. Six miles south of Leavenworth, WA. Timber. Active fire behavior with torching and spotting. Numerous residences threatened. Area closures in effect.

**Chiwaukum Complex**, Okanogan/Wenatchee NF. Nine miles northwest of Leavenworth, WA. Timber, heavy logging slash and brush. Active fire behavior with isolated torching. Residences, transportation and utility corridors threatened. Evacuations and area closure in effect.

**Duncan**, Okanogan/Wenatchee NF. Thirty miles northwest of Entiat, WA. Timber. Active fire behavior. Residences threatened. Area closures in effect.

**South Fork Complex** (2 fires), Prineville District, BLM. Transfer of command from IMT 2 (Watts) to IMT 1 (Lewis) will occur tomorrow. Twenty miles south of John Day, OR. Timber and grass. Active fire behavior with spotting. Structures threatened.

**5 Mile**, Wallowa Unit, Oregon DOF. IMT 2 (D. Johnson). IMT is also managing the Somers fire. One mile south of Imnaha, OR. Timber and grass. Creeping and smoldering with isolated torching. Numerous structures threatened.

**Somers**, Wallowa-Whitman NF. Fifteen miles east of Imnaha, OR. Timber and grass. Active fire behavior. Structures threatened.

**Little Bridge Creek**, Okanogan/Wenatchee NF. Transfer of command from IMT 2 (Leitch) to IMT 1 (Lund) will occur on 8/11. Ten miles west of Winthrop, WA. Timber. Moderate fire behavior with group torching and short-range spotting. Numerous residences threatened. Area closure in effect.

**Upper Falls**, Okanogan/Wenatchee NF. Seventeen miles north of Winthrop, WA. Transfer of command from IMT 1 (Blume) to IMT 1 (Lund) will occur on 8/11. IMT is also managing Carlton Complex. Timber. Active fire behavior with crown runs. Structures threatened. Area closures and evacuations in effect.

**Carlton Complex**, Northeast Region, DNR. Started on private land seven miles south of Twisp, WA. Timber, light logging slash and brush. Interior burning. Numerous structures threatened. Evacuations, area and road closures in effect.

**Beaver Complex**, Medford Unit, Oregon DOF. IMT 2 (Cline). Twenty-one miles southeast of Ashland, OR. Timber and brush. Minimal fire behavior. Numerous structures and energy infrastructure threatened.

**Staley Complex**, Willamette NF. IMT 2 (Russell). Twenty-eight miles south of Oakridge, OR. Timber. Active fire behavior with isolated torching. Area closure in effect.

**Bald Sisters**, Malheur NF. IMT 2 (Day) and NIMO (Quesinberry). Twelve miles east of Prairie City, OR. Timber. Backing and smoldering with isolated group torching.

\* **South Cle Elum Ridge**, Okanogan/Wenatchee NF. IMT 2 (Allbee). Seven miles southwest of Cle Elum, WA. Timber. Active fire behavior with spotting. Residences threatened.

\* **Bear Butte 2**, Deschutes NF. Transfer of command from IMT 2 (Williams) back to local unit will occur today. Previously reported incident under the Logging Unit Complex. Twenty-three miles southwest of Warm Springs, OR. Timber and grass. Creeping and smoldering with isolated torching.

**Camp Creek Complex**, Rogue River-Siskiyou NF. Thirty miles northeast of Medford, OR. Timber. Minimal fire behavior with isolated torching.

**Nene Creek**, Warm Springs Agency, BIA. Twenty-two miles north of Warm Springs, OR. Timber, brush and grass. Minimal fire behavior with occasional interior torching. Structures threatened.

**Predictive Services Discussion:** Another round of heavy rain and strong winds is possible over Hawaii later today as hurricane Julio approaches. A cold front moving through the Northern Plains will bring breezy conditions to eastern Montana with isolated showers and thunderstorms. Scattered showers and thunderstorms are also expected in the Great Basin and along portions of the Sierra Nevada Mountains with a tap of monsoonal moisture. A stationary front extending from the central Plains to the Mid-Atlantic coast will be the focus for rain showers and thunderstorms that may bring heavy rain to the Carolinas.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Sadler Fire Entrapment – August 9<sup>th</sup> 1999 - Nevada

On August 5, 1999, a dry lightning storm passes through northern Nevada that ignites numerous fires. Due to a wet winter and spring, the fuels are abnormally heavy. Now, deep into summer, these fuels are measuring less than 80% live fuel moisture. Normal fire suppression tactics have not been effective on previous fires, particularly direct attack and burning operations during the heat of the day. The weather and fire behavior forecasts predict extreme burning conditions. This same day as the lightning storm, a Type 2 crew—the GNP3—is assembled in California. This crew consists of 21 members (17 FFT2s) from fuels and suppression modules as well as non-fire and overhead positions from various home units. The following day, they are dispatched to the Sadler Complex south of Elko, Nevada. During the next two days, they work on the fireline. The next day, August 9, while conducting a burnout operation, six firefighters from the GNP3 crew are entrapped by wildfire.

**0600** Briefing starts unannounced and several crews and overhead miss some or all of it. Briefing places little emphasis on a red flag warning that has been issued for high winds, low RH, and unstable atmospheric conditions. The IAP forecast calls for extreme fire behavior with high rates of spread, south winds increasing in afternoon, minimum RH 6-12%, Haines Index of 6, max temp 85-91, and FDFM of 3%. However, there are not enough IAPs for everyone—including the GNP3 crew boss and a DIVS. Extreme fire behavior is discussed at the GNP3 crew briefing and is characterized as “normal”.

**0900** GNP3 is assigned to support 2 Interagency Hotshot Crews asked to burnout from Big Safety Zone to the NW and the dozer line to Black Safety Zone. The dozer line is about ½ mile north of the head of the fire.

**1100** After a recon, the hotshot superintendents refuse to accept burnout assignment until the line south of Big Safety Zone is secure. The DIVS and the 2 IHCs leave to do the other burnout. GNP3 waits.

**1300** GNP3 accepts assignment to burn out across the head of the fire from Black Safety Zone going east to the “Y”.

**1400** Ignition is delayed due to unfavorable winds. Overhead feels if they “didn’t attempt a burn, the fire would get away”. Plan is changed to burnout from the east to the west instead—the very plan that the hotshots had refused.

**1430** Due to concerns regarding GPN3 crew’s lack of experience and fitness, only 3 members and the crew boss are used for the firing operation.

**1500** This squad begins firing from the “Y”—without an anchor point—supported by an engine. The fireline behind them is unsecured. Due to hills, no one on the burnout squad can see the main fire. There are no aircraft to assist as lookout. Because of occasional wind shifts, the igniters must walk very fast and occasionally trot to keep ahead of their fire. They are unable to use the black as a safety zone. For these burning conditions, safety zones along the dozer line are too small and too far apart.

**1515** Back behind the firing squad, the engine is very busy picking up multiple spot fires and slopovers. The engine captain radios to stop ignition. There is no response. The same tactical channel is also being used by the other burnout and is overloaded with traffic.

**1530** Half way through the 1.3 mile burnout, two more GNP3 members join the firing squad.

**1540** Overhead watching the burnout sees the main fire become visible and take off down the hill toward the squad. They attempt to warn the squad but are unable to make radio contact. Shortly after, the main fire becomes visible to the squad as it crests the ridge to the south. It is described as a “river of fire” as it makes a run at the dozer line and the crew at speeds in excess of 300 chains per hour with 15 ft. flame lengths.

The engine is cut off from the squad and retreats to a safety zone. The order to “run” is given to the firing squad. Tools and gear are dropped on the way to the safety zone, almost 600 ft. away. Several crewmembers unsuccessfully attempt to deploy their fire shelters.

Crew members receive 1<sup>st</sup> and 2<sup>nd</sup> degree burns and smoke inhalation. An injured crewmember, an EMT, suffering from smoke inhalation, is asked to provide first aid for the others.

### Lessons Learned Discussion Points

- *What are your responsibilities if you are asking another resource to take an assignment that has previously been turned down?*
- *The burnout was a potentially dangerous assignment. What will you do to size up your resource’s capabilities and experience and assign them to appropriate tasks?*
- *As a crew/crewmember, you have a responsibility to look after your own safety—which includes the right to accept or reject an assignment. Have everyone turn to page 19 in the IRPG to discuss how to properly refuse risk.*
- *Discuss how you and your crew would apply LCES throughout the day on this incident.*

**Have an idea? Have feedback? Share it.**
